RULEBOOK

THE WITCHER®

PATH OF DESTINY

STRETCH GOALS

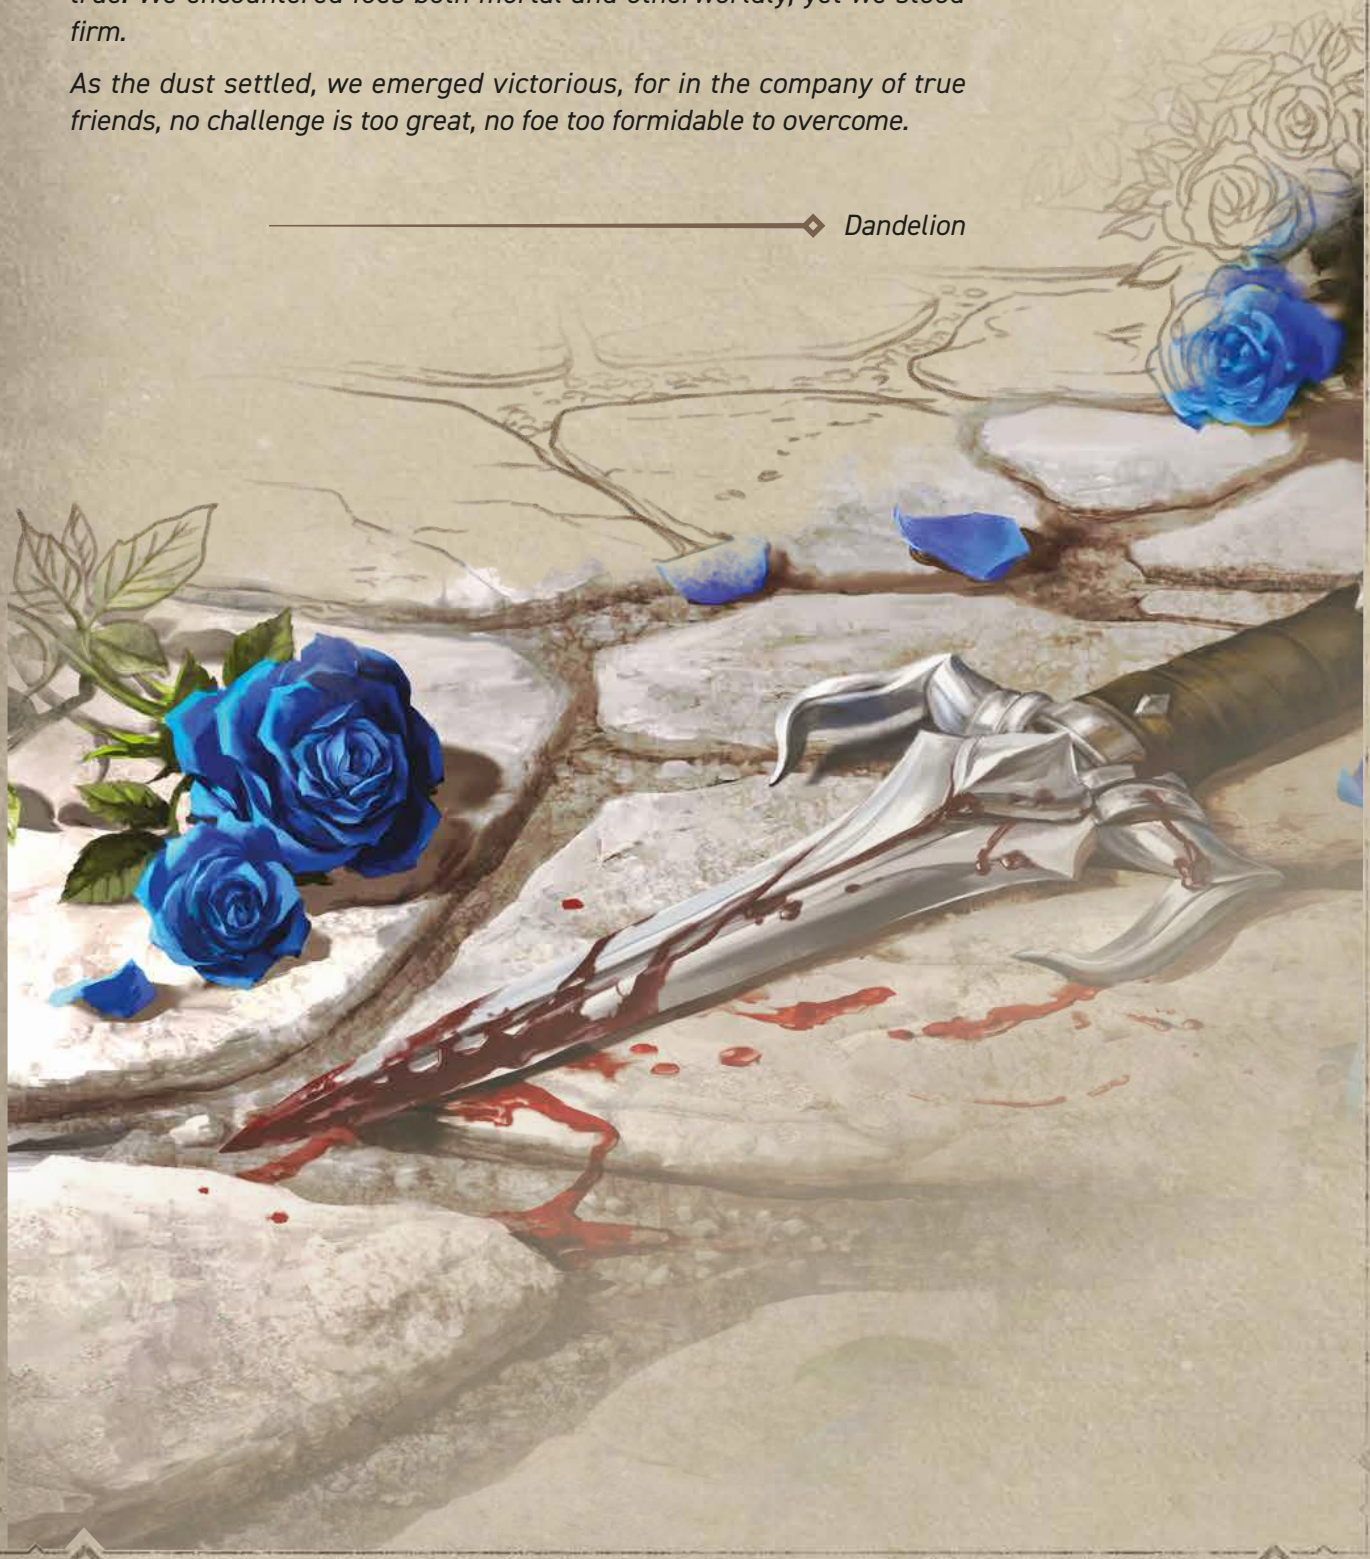

Gather 'round, and hear a tale of valor and destiny.

In Nivellen's manor, our fellowship began to form. Triss stood by my side, Dijkstra and Regis brought cunningness and wisdom. Yarpen and Letho lent their strength to our cause.

Together, we ventured to the shores of Skellige, where a murder awaited our investigation. A doppler infiltrated our midst, testing our trust. We helped the majestic Golden Dragon, and a djinn made our wishes come true. We encountered foes both mortal and otherworldly, yet we stood firm.

As the dust settled, we emerged victorious, for in the company of true friends, no challenge is too great, no foe too formidable to overcome.

CONTENTS

5 sets of new chaacters components – each containing:

Character board

Character standee

5 Starting Action cards

4 Ability markers

4 Character tokens

2 Experience markers

Side Quest

1 Automa board for Solo Mode

5 new tales

5 Companions

3 Villains

1 double-sided Solo board

9 Voice of Reason envelopes

COMPANIONS

You may use this optional module when playing any Tale, also in Solo Mode. The module is not compatible with the Wild Hunt and Legendary Monsters expansions, nor the Witcher: Path of Destiny RONIN standalone game. Each Companion provides a different set of abilities, available to all Players.

CONTENTS

5 Shani cards

5 Keira Metz cards

5 Vernon Roche cards

5 Milva cards

5 Zoltan Chivay cards + 1 Field Marshal Windbag card

SETUP

Pick any Companion and shuffle their set of cards face down. Place it next to the playmat.

DRAFTING CARDS

At the start of a new Chapter, draw a new Companion card and place it face-up next to the bottom-most available spot on the playmat (4th in a 1,2, or 3-player game, 5th in a 4 or 5-player game), discarding any Companion card already there to the box. A total of 3 Companion cards will be used in each game (1 for each Chapter).

When choosing a spot next to the Companion card, **before drafting cards** you may use their ability instead of following the usual Tale effect (typically gaining an extra Experience Point).

ZOLTAN CHIVAY

When using Zoltan's abilities, flip the Solo Mode Destiny token from the Core game to determine the outcome.

VILLAINS

You may use this optional module when playing any Tale, also in Solo Mode. The module is not compatible with the Wild Hunt and Legendary Monsters expansions, nor the Witcher: Path of Destiny RONIN standalone game. Each Villain provides a different twist on the gameplay. Select **one of them** to face during your game.

CONTENTS

5 Vilgefortz cards

5 Leo Bonhart cards

6 Gaunter O'Dimm cards

GAUNTER O'DIMM

SETUP

Shuffle and place O'Dimm cards in a face-down pile next to the playmat. When any Player **gains their 15th Experience Point**, finish the current Step of the Turn and perform a Pact offering Step.

If no Player has gained 15 Experience Points by the end of the game, O'Dimm ignores Players – no Pact is offered.

PACT OFFERING

Reveal the top O'Dimm card. It shows the Pact condition. Only one O'Dimm card will be revealed during the game.

Each Player in the Initiative order decides whether to sign the Pact or not.

If they do not sign the Pact, they immediately lose 1 Victory Point.

If they do:

- they take any other O'Dimm card from the pile and tuck it face-down under their Player board ignoring its effect. This card acts just as a reminder; a mark,
- at the end of the game, they check if the condition of the Pact is fulfilled.

END OF THE GAME

Depending on the Pact card, check its condition at the proper moment at the end of the game.

If a Player meets the condition, they gain 2 Victory Points.

If they do not, they lose 3 Victory Points.

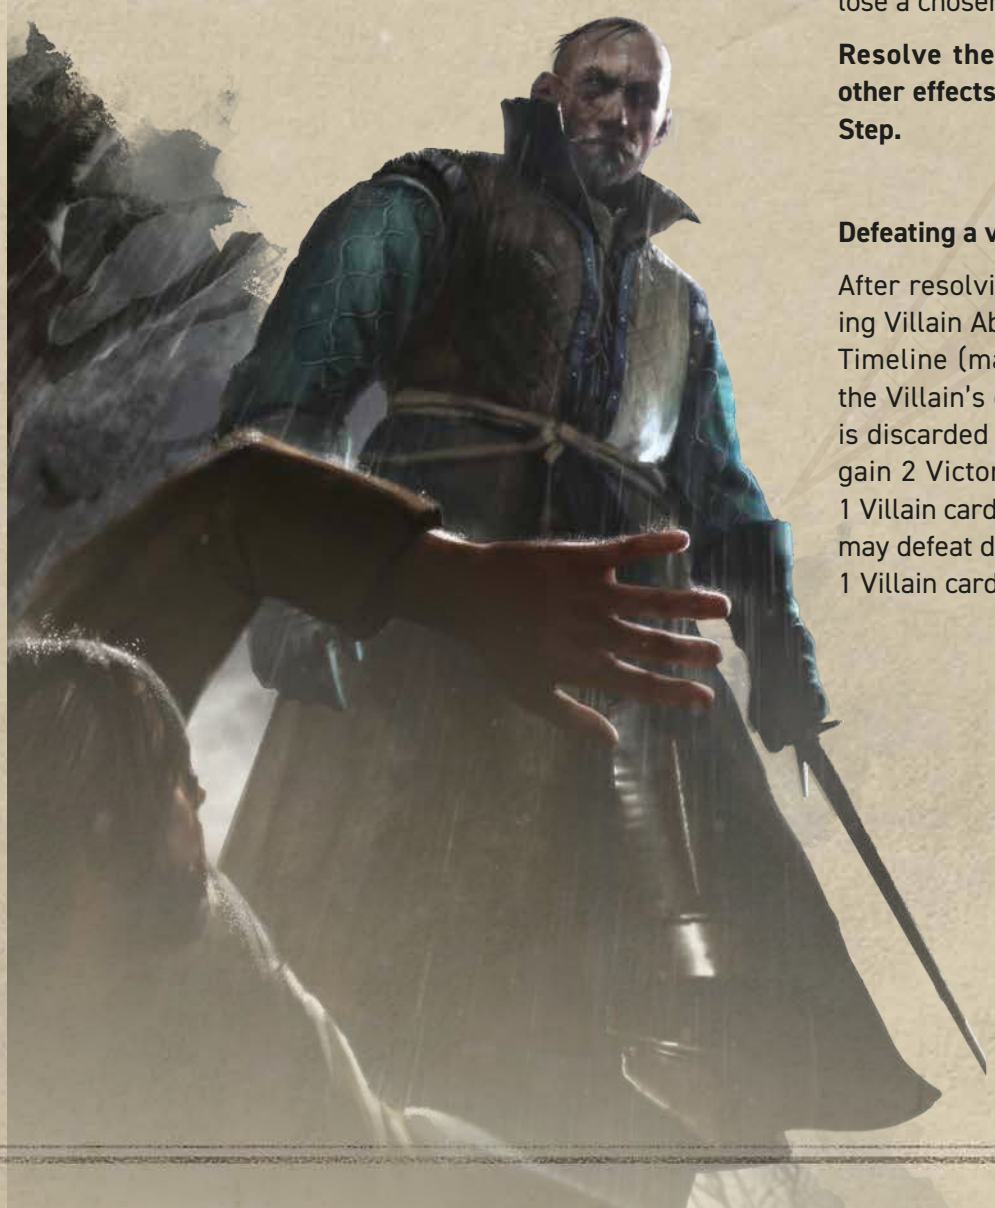

VILGEFORTZ & LEO BONHART

SETUP

Choose a villain to fight against. Shuffle 3 random Vilgefortz or Leo Bonhart cards into the Main deck and put the rest back in the box. These cards represent the villain's different Abilities that will weaken Players.

DRAFTING CARDS

Whenever a Villain card is drawn, set it aside face-up next to the playmat and continue drawing. The Villain's Ability on it becomes active in the next playing cards Step. There may be more than 1 Villain card active at a time.

PLAYING CARDS

Villain ability

VILGEFORTZ

Each card introduces the passive effect that impacts the Action cards Players play to their Timelines. These effects are ongoing for the remainder of the game, or until the villain is defeated.

LEO BONHART

Each card checks if Players have a specific effect on the last 2 cards in their Timelines. These effects are ongoing for the remainder of the game, or until the villain is defeated. If a Player didn't play any card with the specific effect, they lose a chosen Symbol.

Resolve the Villain ability after resolving all other effects that happen after the playing cards Step.

Defeating a villain

After resolving all played cards' effects (including Villain Ability) check if the last 2 cards in any Timeline (may be more than 1 Player's) match the Villain's card condition. If so, the Villain card is discarded and Players, who met the condition, gain 2 Victory Points. 1 Player may defeat only 1 Villain card each turn, though 2 or more Players may defeat different cards if there was more than 1 Villain card active.

VOICE OF REASON ENVELOPES

Each envelope contains secret components that you may add to your future games upon completing a list of achievements.

CONTENTS

9 envelopes

SETUP

After setting up the game (also in Solo Mode), find the envelope matching the chosen Tale. Read the achievement list. These are the additional tasks that Players may complete during the game.

Note: *You may unlock 2 achievements on RONIN envelope when playing any tale, in addition to that tale's envelope. The other 2 achievements are to be unlocked when playing RONIN (mark them as completed if you do not own it).*

When the game ends, check if any of the achievement conditions are met. If so, mark them off with a pen.

If all of the achievements on the envelope are marked off, open the envelope containing new content, inspired by the Tale. Some components will introduce new rules, with clarifications found inside the envelope.

You may use the unlocked content in future play sessions, including replaying the Tale with components of its unlocked envelope. Though it is possible to play with most unlocked content at once, we advise selecting 2-3 modules at most.

NEW CHARACTERS

SETUP

When choosing Characters, add the following Characters to the pool and follow the usual setup.

Add all the new Automa boards to the available pool for Solo mode.

TRISS

A dear friend of Geralt, Yennefer, and Ciri. Triss is a powerful sorceress who wields elemental magic and an alchemy expert who is also allergic to potions. Her teleportation abilities will come in handy.

Let yourself be enchanted by her unique abilities, which can mix things up before the playing cards Step.

GAMEPLAY

Triss' starting Action card ability:

Lose 2 Non-Active Symbols to gain 4 Experience Points.

LETHO

Letho of Gulet - a witcher from the School of the Viper who has a fine collection of royal head trophies. Fear not just his two-handed sword but his cunning plans and improvisational skills. Stay several steps ahead of everyone else!

Letho is the perfect character for players who appreciate tactical depth and the art of manipulation. His abilities add a pinch of negative interaction.

GAMEPLAY

Unlike the other characters, Letho's first Ability is not available from the beginning of the game.

Use Letho's Abilities after all other Players (ignoring the Initiative order).

If Letho uses an Ability and he isn't able to draw any card, the Ability is still used.

Letho's 4-color card follows all the rules for multicolor cards.

Letho cannot be chosen as the Player's Character in Solo mode.

NEW CHARACTERS

YARPEN

Raise your glasses, the dwarf is coming! Yarpen Zigrin, Geralt's companion, wields a tongue as sharp as his axe. He will drink beer and tell an obscene joke, and if necessary, he will roll up his sleeves and stand up to anyone who gets under his skin.

Dwarven pride and a tough head correspond to his unique abilities and open up new opportunities for a Player to gain Symbols and cards!

GAMEPLAY

Use Yarpen's Abilities before all other Players (ignoring the Initiative order).

DIJKSTRA

Sigismund Dijkstra - the former head of Redanian Intelligence and de facto ruler of the country, operating as Sigi Reuven, a Novigrad gang boss.

Dijkstra is a perfect character for those who value ruthless political intrigue and cold calculation. His cunning machinations can really shake things up on the Initiative track during the Card drafting Step, keeping him two steps ahead of his adversaries.

GAMEPLAY

When using 4th Ability, Dijkstra cannot use the extra effect if he is already last in the Initiative order.

Dijksta's starting Action card ability:

Have at least 3 cards in the same color (red, yellow or green) in your Timeline to gain 1 Symbol of each type.

REGIS

Emiel Regis – powerful higher vampire, wise and well-educated surgeon, who, unusually for a vampire, decided to become abstinent. Use the knowledge of ages to become the most significant character in the tale!

Regis never leaves without his bag of herbs. They not only give him a characteristic scent but also provide him with unique abilities. His skills focus on gaining energy from Lost Symbols.

GAMEPLAY

One of Regis' starting Action card has no color of its own. Instead, after being played to a Timeline, it gains color of the preceding card. When this card is drawn for any effect checking the card color, ignore it and draw another one.

CRIMSON AVENGER / ASSHOLE

The nemesis of Oxenfurt's thugs, the savior and idol of noblewomen, the hero we don't deserve – the Crimson Avenger... who is only a small step away from the infamous title of the Crimson Asshole.

The Crimson Avenger / Asshole is a double-sided board for Solo mode.

Choose one for Automa when playing Solo mode.

1-4 PLAYERS

A GRAIN OF TRUTH

Once upon a time, there was a half-man, half-beast called Nivellen, living in a wonderful house full of secrets and magic. And one day, some people were killed.

In this Tale, Players meet Nivellen - a mysterious lord of a manor. They will interact either with him, or his magical house, to learn more about his true motives, hoping to solve a series of ominous events. Does Nivellen have anything to do with it?

Nivellen, a mischievous host, appears on the Initiative track, and you need to consider him when planning your moves. New Mystery cards will bring you closer to learning Nivellen's secret. Dealing with an unknown type of magic always involves a choice: to do what is right or what is beneficial.

STARTING INITIATIVE ORDER

- Dijkstra
- Dandelion
- Yennefer
- Triss
- Yarpen
- Regis
- Ciri
- Vesemir
- Geralt
- Letho

CONTENTS

23 Tale cards

16 Mystery cards

1 Nivellen standee

1 Authority token

1 Nivellen's Vote token

1 Determination token

SETUP

Place Nivellen standee below all Characters on the Initiative track.

Place Nivellen's Vote token, Determination token, and Authority token nearby.

Do not place the Extra Experience token on the board when setting up the game. Instead, Players will be able to gain an extra Experience Point by being below the spot chosen by Nivellen when drafting cards.

Place the shuffled face-down Mystery cards deck next to the playmat, near the Victory Points track.

Look through the Mystery cards and remove those that correspond to the Characters players chose. Shuffle the deck and place it next to the playmat.

Example: *Players chose to play as Geralt, Dandelion, and Ciri, so the following Mytery Cards are removed:*

DRAFTING CARDS

Before revealing new Action cards for the first Turn (then at the end of each Chapter), draw 2 Mystery cards and place them face-up next to the Tale cards, one on each side.

Each Mystery card corresponds to one of the Active Symbols.

These cards give players additional challenge and scoring opportunities. At the end of the Chapter, one of the Mystery cards (corresponding to the Dominating Symbol) will grant additional Symbols.

When it's Nivellen's initiative, place him in **the lowest available spot with any Active Symbols on the pair of cards.** If there's no such pair available, place him in the bottom-most available spot.

Example:

and are the Active Symbols. There are 2 Pairs of cards with Active Symbols. Nivellen is placed next to the lower one.

Nivellen drafts the pair of cards in his spot but discards them instead of playing. Check for any Active Symbols on the discarded Action cards (ignore their effects). Place Nivellen's Vote token on the Tale card corresponding to the Active Symbol there was more of.

In case of a tie (especially if there were no Active Symbols on the discarded cards), flip the Nivellen's Vote token and place it on the Tale card corresponding to the result.

Example: *Nivellen drafted and discarded cards with one . He puts his token on the Tale card with .*

After all Players and Nivellen drafted their cards, the Characters in spots below Nivellen gain 1 Experience Point.

When moving Characters back to the Initiative track, treat Nivellen as any other Character – he keeps his relative position.

PLACING THE DESTINY TOKEN

Nivellen's Vote token counts as one Player's vote towards placing the Destiny token on the appropriate Path. Resolve any ties following the regular rules.

After Placing the Destiny Token, remove Nivellen's Vote token from Tale Card and place it near the playmat.

THE END OF THE CHAPTER

After determining the Dominating Symbol, but before scoring Victory and Experience points, resolve the Mystery card **corresponding to the Dominating Symbol.** The other Mystery card's effect is ignored.

- Check the Mystery card's condition regarding cards in Timeline, ignoring Lost Symbol tokens on cards (read them as printed).
- The Player with the highest number of cards meeting the condition gains 2 Dominating Symbols. **In case of a tie, all tied Players gain Symbols.**
- Discard face-up Mystery cards.
- Draw the next 2 Mystery cards and place them next to the Tale cards, one on each side.
- Proceed to score Victory and Experience Points.

Example: ⚔ *was the Dominating Symbol for the Chapter. All Players now check the condition of the Mystery card next to the* ⚔ *Tale card. The condition says: Have the most cards without Symbols.*

Player A *has 1 such card in their Timeline.*

Player B *has 2 such cards in their Timeline. Cards with Lost Symbols do not count towards this condition.*

No other Player has cards without Symbols in their Timelines. **Player B** *gains* 2 ⚔.

After the 1st Chapter, the Player that has the most Dominating Symbols, as a reward from the Tale cards, gains 1 of the 2 special tokens, that may be used at the end of future Turns:

- Determination token - when gaining Dominating Symbols for the Mystery card, discard this token to gain an additional 1/1/2/2 Symbols if playing a 1/2/3/4-Player game.

- Authority token - when counting votes at the Placing the Destiny token step, discard this token to add 1/1/2/2 Player's votes to your side if playing a 1/2/3/4-Player game.

3-5 PLAYERS

SKELLIGE

The fog shrouding the frigid archipelago of Skellige hides mysteries. Use your deduction skills to unravel the mystery of the mysterious death of a priestess. You'll get caught in the intrigue being played out between clans. Where honor and old grudges clash, conflict seems inevitable. Will your cunningness guide you to the killer before clan war erupts?

Navigate through the treacherous tides of deceit by unveiling Alibi cards, and gathering information exchanged over the table. Write down your clues and try to deduce who is the murderer before the game ends.

STARTING INITIATIVE ORDER

- Triss
- Yennefer
- Vesemir
- Letho
- Regis
- Dandelion
- Dijkstra
- Ciri
- Yarpen
- Geralt

CONTENTS

23 Tale cards

Investigation board

16 Alibi cards

10 Investigation cards

5 Player screens

16 Clue tokens

1 Deduction pad and 5 pencils

1 Investigation token

SETUP

Shuffle the Alibi cards deck and prepare an area next to the playmat:

- Place 3/2/1 cards face-up for 3/4/5 Player game, they form the Innocent pool,
- Place 4/3/2 cards face-down for 3/4/5 Player game, they form the Suspect pool.
- Place 3 cards face-down as the Killer pool, 2 cards will be revealed at the end of the 1st and 2nd Chapter, respectively, the 3rd card is the Killer you need to identify,
- Give 2 cards to each Player (they should inspect them secretly).

Setup for Alibi cards depending on the player count:

An example of a 3 Player game setup:

Each Player receives one sheet from the Deduction pad, pencil and a screen to take secret notes on the information they gather during the game. To know who the Killer is, Players will investigate Alibi cards either in the Suspect pool, or in other Player's pools.

Alibi cards have unique sets of 1 of 4 Professions (Shildmaiden, Guard, Skald, Boatman) and 1 of 4 Clans (Tordarroch, Dummond, Dimun, Heymaey).

Shieldmaiden, Tordarroch | *Guard, Dummond* | *Skald, Dimun* | *Boatman, Heymaey*

Set up the Investigation board next to the playmat. Shuffle the Investigation cards and place the pile face-up below the left space of the board (A). Place 1 card from the top of the pile below the spaces with the Active Symbols (B),(C).

During the game, Players will take Investigation Action, placing the Investigation token next to the action's target (the Suspect pool, or other Players).

The Investigation Action cannot target a Player or the Suspect pool when the Investigation token is next to them.

During the setup, place the Investigation token next to the Investigation board.

Place Clue tokens nearby.

DRAFTING CARDS

Before revealing new Action cards for the Turn, reveal the new Investigation card (skip it in the first Turn of the game):

- discard the card below the Right Path Active Symbol (C) to the box,
- move the card below the Left Path Active Symbol (B) to the space below the Right Path Active Symbol (C) – its condition will be active this Turn,
- move the card from the top of the face-up pile (A) to the space below the Left Path Active Symbol (B) – its condition will be active this Turn,
- the card on top of the pile (A) will show which condition will be active next Turn.

After the playing cards Step, play an additional Step in each Turn:

INVESTIGATION

In Initiative order Players compare the last 2 cards in their Timeline to the conditions of Investigation cards below the spaces with Active Symbols (B), (C). The order of played cards does not matter for fulfilling the condition.

If a Player meets the conditions of the 2 Investigation cards, they choose only 1 to resolve.

Each Player who meets any of the conditions, in the Initiative order, gains the Active Symbol shown above the Investigation card, and performs one of three actions as the Investigator: Investigate another Player, Investigate a Suspect or try to Identify the Killer.

All Players mark all the information they saw, heard or deduct in their Deduction pads.

The conditions may require Players to have:

 cards in the specified color

 a multicolor card

 a card with 2 Symbols

 a card without Symbols

 a card with exactly 1 Active Symbol

 a card with exactly 1 Non-Active Symbol

 a card with the 1-3 multiply effect

Investigate another Player:

- choose a Player without the Investigation token, and place the token in front of them,
- choose one Clan or Profession and ask the Player if any of their Alibi cards belongs to the chosen group,
- if the Player has an Alibi card in question, they secretly show it to the Investigator (they may choose any card if more than one meets the criteria).

Investigate a Suspect (only if the Investigation token is not next to the Suspect pool):

- place the Investigation token next to the Suspect pool,
- choose and secretly look at any Alibi card,
- place a Clue token of either Clan or Profession of the Alibi card next to it, visible to all Players, if there was a Clue token already, you do not place another one,

Try to Identify the Killer (once per game):

- mark the cell you think belongs to the Killer with an "!" and circle the cell and the current Turn number in the Deduction pad,
- you may no longer perform Investigation actions for the duration of the game, though you still gain the Active Symbol if you meet the Investigation card condition.

THE END OF THE CHAPTER

After gaining Left and Right Path tokens, if it is:

- the 1st Chapter – flip the first card in the Killer pool face-up
- the 2nd Chapter – flip the second card in the Killer pool face-up
- the 3rd Chapter – **keep the last card face-down**

THE END OF THE GAME

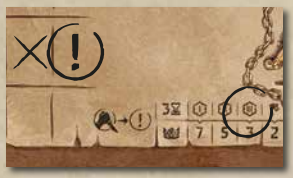

After scoring Victory Points for Side quest and Experience Points, any Player who did not try to Identify the Killer during the game does so now.

Follow the instructions on the Tale cards.

All Players then reveal their Deduction pads and the Killer card is turned face-up.

All Players who correctly Identified the Killer score additional Victory Points, according to when the Player Identified the Killer:

- during the 1st Turn of the 3rd Chapter, or earlier – 7,
- during the 2nd Turn of the 3rd Chapter – 5,
- during the 3rd Turn of the 3rd Chapter – 3,
- at the end of the game – 2.

Example: *A Player Identified the Killer correctly in the 3rd Turn of the 3rd Chapter. They score 3.*

If at least one Player Identified the Killer correctly, continue reading the Epilogue (the Killer is identified). If no Player correctly identified the Killer, read "the Killer remains unidentified" Tale card.

Noting information in Deduction pads:

1. *cross out your Alibi cards and any card revealed during the game with an X, these are not the Killer,*

2. *put a Player's initials in a card's cell when you investigate their cards and cross it out, or mark possible cells when other Players investigate them,*

3. *put a Suspect number in a card's cell when investigating cards in the Suspect pool and cross it out, or mark possible cells when other Players investigate them.*

3-5 PLAYERS

DOPPLER

Imagine crossing the streets of Novigrad and you suddenly notice... yourself. You've just been dragged into a real mind game of deception and tricks. It looks like someone has infiltrated your team, taking the place of one of you! Will you be clever enough to identify the doppler?

This Tale puts Players on two opposing teams with different end-game scoring conditions. One or two Players will take on the role of doppler. Dopplers are cunning shapeshifters who also learn the memories and skills of the person they're impersonating.

Players who are not dopplers will share a common Goal - they will know which Goal token color corresponding to cards will score Victory Points at the end of the game. Players will also score points for identifying who among them is a doppler.

STARTING INITIATIVE ORDER

- Geralt
- Yarpen
- Ciri
- Letho
- Regis
- Dandelion
- Djikstra
- Vesemir
- Triss
- Yennefer

CONTENTS

31 Tale cards

14 Identity cards
(12 Goal cards, 2 Doppler cards)

12 Hint cards

Goal track

4 Goal tokens

30 Mistrust tokens

4 bags

SETUP

Do not use Side Quest when playing this Tale.

Place the Goal track next to the playmat and 4 Goal tokens on the 0 spot.

Each Player puts 3 Mistrust tokens and Player tokens matching their chosen Character next to their Player board.

place for Hint cards

Before your first game prepare 4 sets of cards, each in a separate bag.

- Set aside 2 Doppler cards.
- Separate Goal cards (You are not a doppler) and Hint cards into 4 face-down piles, depending on the Goal color. Each of the piles should contain 3 Goal cards showing the same color (e.g. yellow) and 3 Hint cards showing which colors are not the Goal (e.g. blue, green, red).
- Put each pile in a separate bag.

Upon finishing the game make sure you place Hint and Goal cards back in the bag, and keep 2 Doppler cards separate.

Randomly pick one of the bags with Hint and Goal cards, and put the rest back in the box. Take face-down cards out of the bag and separate them by their backs. Place 3 Hint cards next to the playmat. They will correspond to 3 Chapters of the game.

Collect the number of Goal cards and set aside Doppler cards depending on the player count, shuffle, and deal 1 card to each Player.

Players	Goal cards	Doppler cards
3	2	1
4	3	2
5	3	2

Note, that in a 4-player game, there will be one card left. Put all unused cards back in the box, without revealing them.

Let all Players look at their Identity card and learn either what the Goal is, or if they are a Doppler. Place the cards next to Player boards – a Player may look at **their** card at any moment of the game, no one may look at any other Player's Identity card during the game.

If there are 2 Dopplers in a game, they don't know about each other and each of them plays for themselves!

PLAYING CARDS

Once per Chapter, after Playing cards if a Player has 3 or more Non-Active Symbols, they may look at the Hint card corresponding to the current Chapter number and place their Player token next to it. The Player also gains Experience Points:

1 ◆, if they peeked at the Hint in the 1st Chapter,

2 ◆, if in the 2nd Chapter,

3 ◆, if in the 3rd Chapter.

Players may look at the Hint cards next to their Player tokens at any moment during the game, though they may not share any information about them.

THE END OF THE CHAPTER

Advance Goal tokens

Before discarding cards from Timelines, advance Goal tokens. For each 3 cards in one color anywhere in one Player's Timeline, move the corresponding Goal token by 1 spot on the Goal track.

It is possible that one Player moves 2 or more tokens or moves 1 multiple times in each Chapter.

Multicolor cards may be used in multiple sets of 3 colors, though only once per their color.

Example: *move blue and red Goal tokens by 1 spot.*

Accusations and Mistrust

After Advancing Goal tokens, Players have a chance to discuss their observations and share suspicions. When ready, they each pick one of their Mistrust tokens (valued 1 for the 1st and 2nd Chapter, valued 2 for the 3rd Chapter) and simultaneously place it on another Player's board, reflecting their accusations.

THE END OF THE GAME

Reveal cards in your hands and advance Goal tokens following the same rules as before. For each 3 cards in one color **in a Player's hand**, move the corresponding Goal token by 1 spot on the Goal track.

Reveal your Identity cards and score extra Victory Points, based on completing the Goal and identifying Doppler(s).

- If the Goal token matching the Goal cards is **further than** all other tokens, all Players with Goal cards ("not a doppler") score 3 Victory Points. If not, no Points for Goal cards are awarded.
- Check the **value** of all Mistrust tokens on each Player's board. Each doppler scores 7 Victory Points if any "not a doppler" Player has the same or higher total value of Mistrust tokens than they have.
- Each Player scores a number of Victory Points equal to their Mistrust tokens **value** placed on any doppler Player board.

Read the right epilogue, whether the doppler's identity was revealed or not. If at least one doppler's true identity remained unrevealed (there was another "not a doppler" Player, who had the same or higher value of Mistrust tokens), read the section "the doppler's identity was not revealed". Otherwise, read "the doppler's identity was revealed.

Example:

The Identity cards are revealed. Dandelion is the doppler!

The blue Goal token is further on the track than any other token and it matches the Goal cards. Ciri and Dijkstra score 3 *.*

The value of Mistrust tokens on Ciri's board (6) is higher than those on Dandelion's (3), so Players didn't reveal the doppler's identity, and Dandelion scores 7 *.*

The value of Mistrust tokens placed by Ciri on the doppler's board is 3, so Ciri scores 3 *.*

1-5 PLAYERS

GOLDEN DRAGON

After discovering a Golden Dragon nest nearby the town, you and a group of adventurers set off eagerly. It turns out that it might be the last individual of the species. What are you going to do? Will you save the dragon from doom and greed? Or will you cease the treasures from the reptile?

While playing out the story, players can use the Dragon Protection cards to save the creature from danger while gaining bonuses from the Golden Dragon board.

STARTING INITIATIVE ORDER

- Triss

- Regis
- Dandelion
- Dijkstra
- Ciri
- Yarpen
- Geralt

CONTENTS

26 Tale cards

10 Dragon Protection cards

1 Golden Dragon standee

Modular Dragon board (1 Central tile, 9 tiles with bonuses)

4 Life Point tokens

1 Golden Dragon token

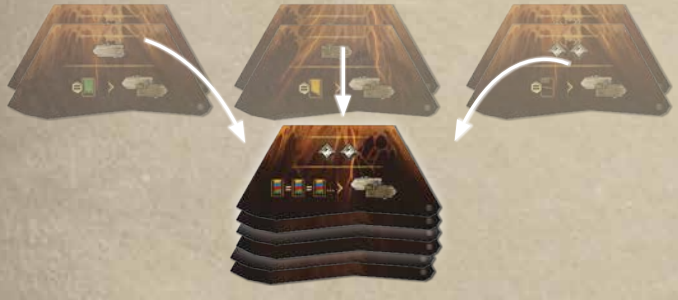

SETUP

Set up the Dragon board next to the playmat:

- Divide the 9 Dragon board tiles into 3 piles, random side up, according to markings in corners (A, B, C).

- Shuffle each pile separately, take 2 tiles from each pile, and shuffle them together.

- Place the 6 tiles around the central tile, forming the Dragon board.

- Place the Dragon standee on a tile marked by the central tile.

- Place Life Point tokens on the central tile:
  - 3 for a 1, 3, or 5-player game,
  - 4 for a 2 or 4-player game.

After drawing the starting hands of cards, each Player draws 1 Dragon Protection card (or 2 in a 2-player game). Shuffle the rest of the cards into the Main Deck.

Note: *when playing with optional modules, it is possible that there are additional cards shuffled into the Main deck. Before shuffling in the Dragon Protection cards, make sure the Main deck holds 68 cards, discarding the excess randomly.*

All Players simultaneously discard 1 card from their hand (or 2 in a 2-player game), they may choose to discard the Dragon Protection card.

PLAYING CARDS

Players will be able to play a special kind of Action cards - Dragon Protection cards. They are all the same and follow all the regular rules for Action cards, with four exceptions:

- Their effect is resolved after all players have played their cards, in the additional Golden Dragon Step.
- They cannot meet any condition when resolving effects.
- They have no color. If a Dragon Protection card is drawn for any effect checking the card color, ignore it and draw another one.
- Players cannot keep them for the next Chapter in their Timelines.

DRAGON PROTECTION CARD EFFECT

Move the Dragon clockwise by 1 tile.

Any number of times: lose 1 Non-Active Symbol to move the Dragon by 1 additional tile.

Gain the effects from the tile the Dragon ends its move on.

After the playing cards Step, play an additional Step in each Turn:

GOLDEN DRAGON

Move the Dragon

Players who played Dragon Protection cards resolve all its effects (move and gain bonus) in the Initiative order.

The Dragon Protection card's effect allows the Player to move the Dragon on its board and gain bonuses: one that is certain (, or 2), and the other, dependent on meeting a condition.

GOLDEN DRAGON BOARD CONDITIONS

Anywhere in their Timeline, the Player has exactly:

/ / / / / / / /	1 / 2 (red/ green/blue/ yellow) cards
=1 / =1 =1	1 / 2 cards with exactly 1 Symbol
/	1 / 2 cards with a Non-Active Symbol
	1 card with 2 Symbols
	1 card without Symbols
	1 multicolor card
1 2 3	1 card with the 1-3 multiply effect
= = ...	3 cards of a chosen color
	Have cards of exactly 2 colors in your Timeline.

When checking cards conditions, ignore Lost Symbol tokens on cards (read them as printed).

PROTECT THE DRAGON

Players check how many Dragon Protection cards (if any) were played this Turn.

If there were at least:

- 1 card for 1, 2, or 3-player game,
- 2 cards for 4 or 5-player game,

Players managed to successfully protect the Dragon this Turn.

If not, the Dragon loses 1 Life Point – remove 1 token from the Dragon Board.

The game ends after placing the Destiny token in the Turn in which the Golden Dragon loses his last Life Point token.

When the Golden Dragon dies end the Chapter following the regular rules, then end the game, reading the Epilogue corresponding to the Dragon's death.

Example: 

THE END OF THE CHAPTER

Dragon Protection cards may not be kept for the next Chapter in the Timeline clean-up Step.

THE END OF THE GAME

If the Golden Dragon survived through 3 Chapters, proceed to the regular scoring.

THE END OF THE GAME - DRAGON'S DEATH

When the game ends due to the Dragon's death, finish the current Turn and read the Tale page corresponding to the Dragon's death.

The game ends. Following the standard rules of determining the Dominating Symbol, gaining Victory Points and Experience Points, and assigning Left and Right Path tokens.

Each Player additionally:

- gains 2 Victory Points for each Dragon Protection card played in this Chapter,
- loses 1 Victory Point for each Dragon Protection card still in their hand.

GOLDEN DRAGON TOKEN

When receiving bonuses as a reward from the Tale cards, one Player may gain a Golden Dragon token. It has one of two effects, depending on where it is placed by the bonus' effect:

- on the Player's board - Discard the Golden Dragon token when moving the Dragon on its board to move it by 1 or 2 additional tiles.
- above the Player's Timeline - Discard the Golden Dragon token instead of playing 1 card during the Playing cards Step to apply all effects of playing the Dragon Protection card (treat discarding the token as playing the card, the number of cards in hand increases).

If the game ends due to Dragon's death, do not score any Victory Points for the Golden Dragon token.

1-5 PLAYERS

THE LAST WISH

A magical amphora, a broken seal, a Djinn, and three wishes... sound familiar? Forget everything you know and face challenges to prove your worth. Each wish comes with a price depending on the capricious will of the Djinn. With great power comes great problems.

Draw Seal tokens from a bag. Move on the Djinn track if the played cards match the tokens' colors. At the end of each Chapter, the player highest on the Djinn track will draw a Wish card, giving them some new possibilities, symbols, or points.

STARTING INITIATIVE ORDER

- Letho
- Triss
- Ciri
- Yennefer
- Geralt
- Regis
- Dijkstra
- Yarpen
- Dandelion
- Vesemir

CONTENTS

23 Tale cards

15 Wish cards

Djinn track

Djinn board

12 Seal tokens

1 velvet bag

SETUP

Place the Djinn track next to the playmat, each Player places their Player token on the starting spot. Place the Djinn board next to it.

Separate Wish cards according to the Chapter number on their back. Shuffle each of the three piles separately and draw one Wish card face-down for each Chapter. Place them next to the Djinn board and put the rest of the Wish cards back in the box.

Place all Seal tokens in the bag and shuffle them. Players may not inspect the contents of the bag at any point during the game.

Draw 4 tokens and place them on the Past Seal pool on the Djinn's board.

SEAL TOKENS AND THE DJINN BOARD

- Seal tokens represent the power to bind the Djinn to your will to make him fulfill your wish. Players who play cards of colors corresponding to Seal tokens will be able to ask their wish. There are 12 Seal tokens, 3 for each of the 4 colors.
- The Past Seal pool represents used-up power - tokens placed there do not count toward moving on the Djinn track, but help the Players estimate their chances.

- Seal Binding spaces show which Seals have the power to bind the Djinn – playing cards of the same color as the Seal tokens placed in these spaces will move the Player token on the Djinn track, respectively by 1 or 2 spots clockwise.

DRAFTING CARDS

Before the drafting cards Step, draw 1 Seal token from the bag and place it on the Seal Binding +1 space.

PLAYING CARDS

After the playing cards Step draw 1 Seal token from the bag and place it on the Seal Binding +2 space.

Then move the Players' tokens on the Djinn's track by a total of spots, considering the last 2 cards in their Timeline:

- 1 spot up for each card's color (also for a multicolor card) matching the Seal token on the Seal Binding +1 space,
- 2 spots up for each card's color (also for a multicolor card) matching the Seal token on the Seal Binding +2 space,
- 1 spot back for each multicolor card played.

In rare cases when the total number of spots to move is negative (e.g. 2 multicolor cards were played, but there's no match with tokens on the Seal Binding spaces), the Player token does not move back on the Djinn's track.

Example:

The last 2 cards in a Timeline are:

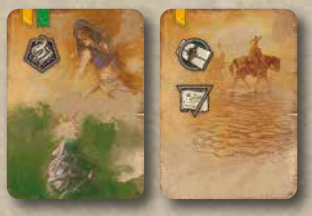

Player 1 *moves by 2 spots on the Djinn track for playing a red card, matching the Seal token on the +2 Binding space.*

Player 2 *does not move on the Djinn track. The blue card should move them by 1, but they deduct 1 for playing a multicolor card.*

Player 3 *does not move on the Djinn track. None of their cards match the Seal tokens and they should deduct 1 for a multicolor card, but Players do not move back on the Djinn track.*

Players immediately gain the bonuses next to each spot they move. If a Player is already on the highest spot, they receive 1 for each spot they would move.

Move the Seal tokens from Seal Binding spaces to the Past Seal pool.

THE END OF THE CHAPTER

The Djinn grants a wish to the Player furthest than all other Players on the Djinn track (resolve a tie according to the Initiative order). They gain the Wish card for the current Chapter, reveal it, and keep it next to their board until the end of the game.

Wish cards for the 1st and 2nd Chapters grant the effects that may be triggered several times during the game, but only once per Turn. The Wish card for the 3rd Chapter rewards the Player with a one-time Victory Points gain.

Before choosing cards to keep in Timelines for the next Chapter, reset the Djinn's board:

- Place all Seal tokens from the board in the bag and shuffle them.
- Draw 4 Seal tokens and place them in the Past Seal pool on the Djinn's board.

SOLO MODE

At the start of each Chapter place Automa's token 2 spots further than the Player.
