Rules of the West: A Western Legends FAQ – Official Answers

Events, Frontier Tokens, Map, Story Cards, and Miscellaneous

Bandit Card Variant: Spawning Bandits.

Q: When playing with the Bandit Card Variant, how does one decide which Bandit to spawn on a space?
A: Just pick one and place it. Doesn't matter which you put where at all. Players have no way to impact the Bandit Cards. The Bandit Cards have iterated abilities, some of which are good, some of which are bad, all of which are balanced against one another. One could, if they like, use a d6 to choose which to spawn where, though that would certainly add time to the game for little benefit, if any.

Bandit Card: Effect.

Q: One of the #1 Bandit Card effects reads "At the end of this fight, you may resolve the effect on a Fight Card that was not played." How is this effect resolved and how does it interact with cards such as Bulletproof - Jack, Quickdraw - Queen, and the Fight Card - 10?
A: This ability results in the extra card being resolved after the fight has concluded.
Bulletproof - Jack would not protect the player from receiving wounds dealt from a Fight Card as a result of the Bandit Card ability in question. This is because the wounds that Bulletproof - Jack would prevent were during the fight. Thus, the same way in which the Fight Card could not prevent the Marshal point from being gained, the protection from wounds due to Bulletproof - Jack has expired prior to such a card being resolved by the bandit card ability.
Quickdraw - Queen would not prevent the text on a Fight Card being resolved by this Bandit card ability as the Fight Card's effect is taking place after the protection provided by Quickdraw - Queen.
The 10 value Fight Card would not cancel the fight if resolved as a result of this Bandit card ability because fight has concluded and it is too late to be cancelled and refought.
Should any other questions arise around this particular Bandit card ability always consider that the Poker Card played by the player has expired and the extra Fight Card is considered to be occurring after the fight.

Bandit Card - 8: Effect.

Q: One effect on a bandit card is the following: “A player that defeats this bandit gains 1 Marshal point or 1 Wanted point. Wanted players may gain Marshal points in this way.” Can a wanted player that defeats a bandit use this effect to gain 1 Marshal point before gaining the 1 Marshal point that they can gain normally for defeating a bandit or must the bandit card effect be applied after the normal effect for defeating a bandit?
A: After.

Buzzard Gulch: Sheriff setup and movement.

Q: Where does the sheriff start and how does he move by rail station and mountain pass?
A: The normal setup is followed, so the Sheriff starts the game in the Sheriff's Office on the main board. As for the how the sheriff moves with the train and mountain passes, unfortunately these 2 lines were missed. They will be added to the pdf here on BGG and our rules at our website. They will appear as notes in the relevant areas:

1) NOTE: Moving the sheriff from one Rail Station to another counts as 1 space.
2) NOTE: Moving the sheriff from one Mountain Pass trail head to another counts as 1 space.

Cattle Tokens: Delivering two.

Q: With the Workhorse, a player can carry two Cattle Tokens. When wrangling or rustling, is the reward doubled for two Cattle Tokens? (Wanted Point or Marshal Point)?
A: You get 1 respective point per cattle token. So if you deliver 2, you get 2.

Cattle Tokens: Limit, pt2, pt3.

Q: How many Cattle Tokens can a player take and have?
A: Players can normally only take and have one Cattle Token at a time. If they have the Workhorse, which is in Fistful of Extras expansion, they can take two, carry two, and deposit two Cattle Tokens.

Q: If I am already at my Cattle Token limit and instructed to gain another what happens.
A: If a player would gain a benefit, such as money when they are already at max money limit, they gain as much of that bonus as possible, not taking any overage.

Cattle Token: Choosing.

Q: The Train Encounter Card Cattle Train states that if you win the fight against the Train Guard, you can gain a cattle token of your choice. Does that mean you can look at all the cattle tokens and choose which one to take?
A: It means a ranch (color) of your choice.

Choices: Options.

Q: If I have no Money, and am given the option to gain a Wound or lose $10, may I choose to lose Money or I must gain a Wound?
A: You are not required to make a choice that changes the game state.

Deeds: End game scoring.

Q: My wife purchased the Deeds to all 3 Saloons. The end of game bonus on each card says you get 1 LP for each Saloon you own. Does she get 3 LPs total at end of game or 9 LP?
A: Each Deed give 1LP per saloon. So 9LP total.

Discarding: Restrictions.

Q: Can you discard unwanted cards as needed?
A: No. you cannot just discard an unwanted card. Cards must be used for an effect. If a card has a discard effect or as part of a goal requirement, then yes.

Effect: Triggers a 2nd effect.

Q: If you gain Marshall, Wanted, or Legendary Points during the read the story step and you pass over an event token, do you immediately resolve the (new) event or finish the entire story card before triggering the (new) event card?
A: Finish resolving the effect that is changing the game state. Afterwards, if this has caused another effect to occur, such as crossing the threshold required to trigger an event, then resolve the new effect.

Event Tokens: Interacting.

Q: Events that have specific Tokens, do you need to spend an Action to interact with them, or do they just happen the second you move into their space?
A: If an Event Token requires an Action to interact with it says so on the card. Those that do not, like Ol' Flippy and Grizzly Bear, resolve when a player moves into the space they occupy.

Event Token: Occupied space.

Q: When you draw an Event Card and it tells you to place an Event Token, but there is already an Event Token or mini already in that place. I know you do not place the new Event Token there but, does that mean you draw a new Event Card to replace the one that didn't work, or do you just put that Event Card in the discard pile, and nothing happens?
A: All aspects of the Event Card that can be resolved are resolved. If that means none of it is resolved then nothing happens and the Event is not replaced.

Event: The Preacher, pt2.

Q: Quick one, there was an event came up ("The Preacher" I think it was) that while the token was held, the player draws a Poker Card at the end of their turn. At what point would this be drawn in the end of turn phase? Before or after stories? Before or after hand size check? etc...
A: The intention is for such effects to check at the start of a player's end of turn phase, which is effectively the end of their turn. As such, it would occur prior to their hand size checking. However, I can see how this could be unclear, and we will add it to the change log as well as define when such abilities check in the upcoming Western Legends: Blood Money rules.

Event: Ol’ Flippy.

Q: I’m assuming Ol’ Flippy won’t move to the other Rail Station if there is a mini or another Event Token there. Is that correct? If it does move, does it activate upon it moving into a space with another player? Or if it doesn’t move, does it only activate when you move into its space, rather than starting in that space?
A: Ol' Flippy can in fact be moved into the other Rail Station if there is another mini or token there. The restriction is on the initial placement of a token or mini and not the movement of one. I am sorry this is not made more clear but is how it is intended to work. However, if there were a player in the space where the token was moved to, in this case Ol' Flippy, it would not be encountered by the player already in that space. Such tokens, like bandit minis in the base game, are only encountered when a player moves into the space they occupy. The token for the Grizzly Bear would work the same way.

Q: I assume if you perform a rail movement into the station Ol' Flippy is occupying, you will encounter him, and then continue with the

movement the action grants you? I further assume that if you move out of the rail station, that does not count as ending your movement in an event token space?
A: If you end a move action in a Rail Station with Ol' Flippy, he is encountered. Traveling by rail does not end a player's move action at the other Rail Station, and therefore the player would not encounter Ol' Flippy. Likewise, a player moving out of a Rail Station where Ol' Flippy is would not encounter him either. Only a player ending their move at the Rail Station occupied by Ol' Flippy tosses the coin.

Frontier Token: Upgrade Mount.

Q: When you get the Frontier Token that says "gain one upgraded Mount" can you just upgrade a mount that you already have, or do you have to get a new one? We played that you could upgrade your current one.
A: You actually gain a new Mount which is upgraded. This is because it says, "gain one upgraded Mount" and not "upgrade your Mount". The idea is that you discover a superior Mount out on the frontier.

Frontier Spaces: Setup, pt2.

Q: I am confused about frontier set up. 7. C. States randomly assign 1 Frontier Token to each space? Which spaces? And what numbers? Mine do not match.
A: Any Frontier Token on any Frontier Space. They aren't meant to match.
A: In each of the nine spaces with a number already printed place one Frontier Token.

Frontier Spaces: Location.

Q: Are Frontier Spaces considered locations when the token has been removed for the purposes of Story Cards?
A: Yes. While the player can no longer take a Frontier Action it is still technically considered being at a location. It would be like being in a store space without Money. As such, a player can take a Work Action at Frontier Spaces if they need Money like any other location.

Gang: Effect stacking.

Q: Do the effects on the Gang Card stack?
A: Actually, they do stack, and a player will draw 3 Poker Cards and discard their Gang when an arrest is attempted against them. Very hard to arrest a player with a Gang!

Gold Nuggets: Depositing 4.

Q: The upgraded Mule and at least one Goal Card give a reward for depositing at least 4 Gold Nuggets. Do these 4 Gold Nuggets need to be deposited all at once?
A: Yes. It's all one action.

Gold Nuggets: Placing.

Q: Can Gold Nuggets spawn on occupied spaces with Bandit/Player/Outlaw/etc.?
A: Yes, they can. Unlike Event Tokens and Bandits from the base game, Gold Nuggets do not have the restriction of needing to be placed in an unoccupied space.

Injury Cards: Discarding Poker cards.

Q: When playing with Injury Cards. How do we handle a player at maximum Wounds who gains 2 or more Wounds from a single source? Do they gain an Injury card for the first Wound and discard a Poker card for each additional Wound beyond the first? Or will they only draw an Injury card, discarding Poker cards from Wounds gained from other source later?
A: The player would draw 1 Injury card and would discard cards on future Wounds.

Injury Cards: Partial healing.

Q: So, when you gain a Wound in excess of the maximum number of Wounds you can have, you draw an Injury Card. You can only have 1 at a time.
While still at your maximum number of Wounds you can take, if you take another Wound, you discard a Poker Card.
Question: What if you healed some (but not all) of your Wounds? When you take a Wound at that point, do you take the Wound AND discard a Poker Card also? The wording makes it seem so, but I just wanted to verify.
A: The rule for Injuries is intentionally worded the way that they are. If you gain Wounds while you have an Injury Card, you discard a card for each Wound gained. It doesn't matter if you partially heal your Wounds, while you have that Injury you suffer the effects. You need to fully heal to get rid of the Injury which typically means a trip to the Doctor.

Longhorn Token: Discarding.

Q: What if some game effect gives you a Longhorn Token, but you don't want it? Does it just disappear, or do you drop it in your space, or what?
A: You must keep a Longhorn Token if you gain one as it is gained automatically. Fortunately, there is pretty much no space that is more than 3 or 4 away from where a Longhorn Token can be dropped off.

Longhorn Token: Delivering.

Q: What reward do I get when I Rustle/Wrangle A Longhorn Token?
The reward mentioned on the subject Longhorn Token (clear) plus 30$ and 1 LP (clear) PLUS the normal 1 Wanted/Marshall point? OR The 30$ and 1 LP replace the ordinary 1 Wanted/Marshall point?
A: You do not Rustle or Wangle a Longhorn Token. It is dropped off like a Cattle Token, but it is its own thing. Those two Actions, Wrangle/Rustle are specific to Cattle Tokens and are what grant the WP/MP, the token itself simply grants the printed reward.

Map: Edge of map space adjacency.

Q: Are spaces on the outer edge of the map adjacent? For example The Bandit in C in the southwest adjacent to the nearest mine.
A: They are considered adjacent, as the faded lines were simply added for artistic value.

Map: Spaces, buildings, and distance.

Q: Some Locations are in the middle of a Space and others are in the corners of bordering Spaces. How are movement points counted when going in those Locations?
A: Saloons and General Stores set on intersections and the player is considered to be at said location by being in one of the spaces touching the building. All other Locations require the player to be in the space with the building, but there is no need to "enter the building. You are at the Location just by being in the Space.
A player can move from the Sheriff's Office to the Bank in 3 movement.
It is 1 movement from the Red Falls Saloon to the General Store as that places the player in a Space touching the junction on which the General Store is located.

Map: Rail Station.

Q: Do you need to cross the rails pictured on the board to be at the Rail Station or is it one big space that spans across the rails?
A: It is one space only.

Mountain Pass: Work Action.

Q: Is the Mountain Pass a location where I can Work for a reward of $10?
A: Yes. Think of it as helping some passing travelers find their way and being rewarded for doing so.

Moving: Backtracking.

Q: When moving, are you allowed to return to your previous space (for example, when you are on the Rail Station and a Story Card provides you with a Cattle Token, can you start your next turn stepping from and returning to the Rail Station to deliver it)?
A: Yes. Technically it would be move out then back in, but functionally it makes no difference as long as you are spending an Action to deliver the token. The fringe case that I can think of would be a situation in which the Sheriff was at a Ranch with the player and the player gained the Cattle Token and became Wanted before their turn without the Sheriff moving into the space, in that case they would not be allowed to move out and back into the ranch space with the Sheriff to Rustle.

Movement: Move Action vs. moving.

Q: Is a Move Action the same as moving? Can I follow a non-Move Action with a card such as Sprint - 3?
A: No. For example, Sprint - 3 may not be played after Saddle up - 2.
Sprint - 3 says "At the end of a move action, play this card from hand to move up to 2 additional spaces." Saddle Up - 2 is a card action that just moves you to a space. It isn't a Move Action, so you cannot follow up with a Sprint - 3.

Movement: Diagonal.

Q: Can you legally move diagonally?
A: Diagonal moves are legal and considered adjacent. This is an unfortunate point of confusion that is sadly not made clear in the original Western Legends rules. If you look at the diagram showing legal and illegal moves, it actually does not show

diagonal to be either and is a poor example. Fortunately, the board has very few of these corner intersections. When updating the rules, we wanted to be explicit that diagonal is considered adjacent for all purposes.

Occupied Spaces: Event tokens, bandits, players, sheriff, and Gold Nuggets.

Q: Is a space with an event token considered to be occupied?
A: For either bandits or event tokens to be placed on a space it must be unoccupied. This means free of other tokens, players, the sheriff, or bandits. Gold nuggets are an exception. This rule is the same for placing bandits or tokens.

Outlaw Camp: Rustle.

Q: Can you Rustle Cattle at the Outlaw camp with Outlaws Tokens there? Do you have to fight the Outlaws before Rustling the cattle? Or can you turn in Cattle Tokens and then Fight the Outlaw. Or do it in any order.
A: They have the same trigger so you can resolve them in the order of your choice.

Outlaw Token: Fight again.

Q: There is an Outlaw Token that indicates 2 Fight Cards drawn. Beneath that, the token reads “If you win, fight again.” Then there is a line followed by a reward that reads “Gain 1 Marshal or Wanted Point.”
If a player wins the first fight and loses the second, is the reward still taken, or is it necessary to win both fights?
A: The player gains the reward for each of the fights it wins. Obviously, the player must win the first fight to get to the second fight. Thus the player could gain the reward zero, one, or two times depending on the number of fights with the token in question they win.

Risk Die: 1 move.

Q: Is the 1 move from the Risk Die a Move Action?
A. The move 1 on the Risk Die is not a Move Action which is why we specifically say so in the rules, anything that triggers off of ending a Move Action does not work.

Start of Turn Phase: Drawing Poker Cards, pt2.

Q: When deciding between taking 2 Poker Cards or 1 Poker Card + $10, can you draw your first Poker Card and look at it before deciding to take the $10 or take a second Poker Card?
A: At the start of the turn phase, you can draw your first Poker Card, look at it, and then decide whether to take a second Poker Card or $10.

*A different answer was provided later.

A: No. The base game rules say the player must choose one: Gain $20, draw 2 Poker Cards, or gain $10 and 1 Poker Card. The player makes the choice of one of these three, and then performs it.

Story Card: Gain 2 or more Legendary Points from a single Action.

Q: Let's say I Arrest someone, get a Marshal Point which puts me at the end of a track, so 2+ LPs. Is the Marshal Point that gives me 2+LPs something that satisfies the Story Card?
A: Yes. While multiple effect were resolved to create the needed 2 LP gain for the Story Card, it was all part of the single Arrest and the rewards directly resulting from that Action that provided the gain. So yes, that Action allowed the player to gain 2 LP or more and thus the player can place their Story Disc.

Q: Does the same apply for Legendary Points gained from the Wanted Track at the end of a turn?
A: It does not, because those points were awarded outside of the resolution of the Action. Those points are awarded during the End of Turn Phase.

Story Card: Infamy.

Q: The story Card Infamy says that you move the Sheriff to a space with a Player. But then you get to move the Sheriff 9 spaces. If the Wanted player survives a Fight with the Sheriff, do they get to move the Sheriff back to Fight with the same Wanted Player and Fight him again in the same Story Card?
A: The Sheriff is moved to another Player when resolving the first part, then Bandits would repopulate the Camps, then the Sheriff moves up to 9 spaces.
Regarding your specific situation, if the Sheriff is moved to a Wanted Player at the Bank during the resolution of the Story Card effect and the Wanted Player wins, then yes, the Sheriff would be able to move from the Sheriff's Office back to the Bank and attempt to Arrest that Player again when resolving the movement part of the card. Unlike PvP, there is no limit to the number of times the Sheriff will attempt to arrest a Wanted Player. This is why ending your turn on the Sheriff’s Office as a Wanted Player can trigger a death loop that ultimately ends in Arrest if the Sheriff enters the space.

Story Cards: Multiple Fights, pt2.

Q: What happens if a Story Card results in multiple Fights?
A: If multiple Players are attacked via a Story Card, resolve the fights individually.
A: Each fight is individually resolved. So start with Active Player, then clockwise for those involved. In a 2p game, you would each draw 3 cards, pick 1, and resolve that card.
Each Fight against an NPC is individual per Player. So, it could be as much as 3 separate fights. Not just 1 Fight Card against 3 Players. All conflict is 1v1, even against NPCs.

Story Card: Spoils.

Q: The card says: "Players that contributed to this gain a non-mount/non-weapon item at no cost. Players with a Ten-Gallon draw 1 Poker Card" One of the players contributed to this story card picked a Ten-Gallon and then he wanted to draw a Poker Card pointing that now he had a Ten-Gallon. Is it legal or should he had already in his possession the Ten-Gallon in order to draw 1 Poker Card?
A: You follow the order of operations. This card intended to encourage players to take the Ten-Gallon, so yes, it would work as such. You could gain the Ten-Gallon and then draw 1 Poker Card.

Story Card: True Grit.

Q: The True Grit Story Card reads:
"Players that contributed to this draw 1 Poker Card. Players that did contribute to this discard 1 random Poker Card or gain 1 Wound..."
Should it instead read:
"Players that contributed to this draw 1 Poker Card. Players that did NOT contribute to this discard 1 Random Poker card or gain 1 Wound..."
A: It's a typo and had been noted. Thanks!

Story Card: War Party.

Q: How is this Story Card resolved when one more than one Player is involved?
A: Each fight is individually resolved. So, start with Active Player, then clockwise for those involved. In a 2p game, you would each draw 3 cards, pick 1, and resolve that card.
Each Fight against an NPC is individual per Player. So, it could be as much as 3 separate fights. Not just 1 Fight Card against 3 Players. All conflict is 1v1, even against NPCs.

Title: Shootist.

Q: Players gain 1 LP after winning a Fight against another Player." This is in addition to the normal rewards, correct? For example, if the Active Player wins a Duel vs another Player, he earns a total of 3 LPs?
A: Correct, it’s worth noting that this also allows players to gain LP as the defender in a fight.

Title: Vigilante.

Q: The Vigilante Title Card reads “Gain 1LP each time you defeat a Bandit or Outlaw. Players may gain WP instead of MP after they defeat a Bandit.” When Fighting the Bandit, specifically, does this mean that a Player gains 1LP from the title, and that they then have a choice per-base game rules of taking 1LP or a MP/WP after defeating a Bandit?
A: The Player would gain 1 LP for defeating a Bandit. Then the player chooses from the standard reward. In the example you use of defeating a Bandit, the Player would gain 1LP from the Title Card and then choose to gain either 1 LP or 1 MP as normal, with the added option of taking 1 WP in place of the MP. Thus, by defeating a Bandit when using the Title Card Vigilante a player could gain the following combinations:
1 LP + 1 LP
1 LP + 1 MP
1 LP + 1 WP

Train Board Extension: Spaces.

Q: This expansion includes a new trifold "topper" for the main board where the Train heads to. How do Players interact with it there?
A: Each Train spot corresponds with a Bandit Hideout on the board. This top map is made to represent the written planning of a Train Heist. The Train moves along that track and if a player is at the right Bandit location, they can attempt a Train Heist.

Q: If the Train is at the space B of the train board,

can I initiate a train heist action only if I'm at the UPPER bandit camp B? Or any bandit camp B?
A: They are actually considered to be part of the same space. So spaces on the Train Board across the top of the board means the Train is considered to be in that specific Bandit Hideout when it is there in the same way the Train is considered to be in the other train checkpoint spaces.

Travel By Rail: Action.

Q: The Player aid says you move to the other Rail Station and then take a Move Action. The rulebook seems to imply that moving after reaching the other Rail Station is part of the same Action. So, does moving after arriving at the Rail Station require another Action?
A: The Travel by Rail Action moves the player to the other Rail Station, and then they begin their Move action from that space. That is all done as part of a single Action that is considered a Move Action.

Q: Can I move to a Rail Station, pay the fee and then continue my move after arriving at the destination station OR do I have to start a new move action at a Station?
A: You must begin a move action at a Rail Station, pay $10, place your miniature on the other Rail Station and complete your Move Action starting from that space.

Wanted Track: "Sheriff Active".

Q: What is the exact meaning of the "Sheriff ACTIVE" text in the first space of the Wanted Track?
A: The sheriff can be moved. If no player is Wanted, the Sheriff will never interact with players.

Wanted Player: Gaining marital points.

Q: Regarding the Black Coat...I thought Wanted layers could never gain Marshal Points unless they got out of jail. If I was Wanted 5x over and got that card and decided to gain the 2 Marshal Points does that mean I've just switch over from being Wanted to a 2 point Marshal just like that?
A: A Wanted player can never choose to gain Marshal Points unless an ability states otherwise. This is in the rules. There are a few Story Cards that allow this, but only those.
In addition, when you switch tracks, you start from the beginning of that track. Also in rules, but wanted to clarify.

Wounds: Limitations.

Q: Can you 'gain' a Wound if you already have three?
Example: Doc Holliday's Legendary Ability allows him to draw a Poker Card every time he gains a Wound. Does that mean his Wound level has to change, or can he still benefit this if he was at 3 Wounds before he took a Wound?
A: If you are at max Wounds, you can still gain Wounds, like for effects, etc. So, yes, Doc Holliday can draw cards.

Poker Cards, Fight Cards, Fights, Bonus, Reactions, and the Sheriff

Arrest: Sheriff movement.

Q: Both sections in the rules for both types of Arrests state the Arrested Player is moved to the Sheriff Space WITH the Sheriff. Does that mean the Sheriff will return to the Sheriff spot when a Marshall Arrests a Player?
A: Yes.

Bulletproof - Jack: Token Rewards.

Q: Bulletproof - Jack:
"If this card is played in a Fight, cancel any Wounds you would gain. Lose 1 Wound."
Claim Jumper:
"Gain 2 gold nuggets and 2 Wounds."
Are the Wounds from the "reward" also cancelled by the Bulletproof - Jack card played in the Fight?
A: Gaining rewards is part of the resolution of a Fight, Bulletproof- Jack would prevent the wounds from the Claim Jumper because you are still within the resolution of a Fight. If token rewards were gained after a Fight had been resolved, then you would gain the Wounds as Bulletproof -
Jack would no longer be protecting you

Bonus and Reaction Effects: Stacking.

Q: Can Reaction and Bonus effects stack or accumulate?
For instance, in a Fight, the Poker Card 'Stick 'Em Up!' allows you to reduce a Card played against you by 2. And an upgraded allows you to reduce the value of a Card played against you by 1. Can the two of those effects "stack" to allow a reduction of three?
A: The answer is YES! So you can do as in your example.

Declining a Fight: Wounds.

Q: If you decline to fight do you still get a Wound (along with the other penalties)? Read narrowly, the rules tell you to get wounded twice if you lose an Arrest Fight (because the rules tell you to apply the standard penalty to all types of Fights and then specifically repeats those penalties only in the Arrest penalties, implying they should be done again).
A: You never gain more than 1 Wound unless a card effect or ability would say so. Being Arrested and robbed is losing a Fight, same as a Duel or losing to a Bandit or the Guard.

Failed Train Encounter Consequence: Arrested.

Q: The Trap and Pinkerton Car Train Encounters both have a consequence of 'Player Arrested', no Wanted Points are gained. What happens to a player with no Wanted Points is Arrested?
A: Since the player is Arrested, they still follow all the action of an Arrest-
Lost all Wanted Points (doesn't apply in this case since they don't have Wanted Points in this rare case)
Lose half their Money
Lose half their Gold Nuggets
Lose any Cattle Tokens
Its important to remember that this was from a player attempting a Train Heist and was stopped. They were performing a traditionally Wanted style action.

Fight Card - 7: Choices.

Q: The Fight Card - 7 allows the opponent to either take a Wound, or discard a Poker Card. Can the opponent choose to take an ineffective Wound while having played the Bulletproof - Jack Poker Card, or are they required to discard?
A: Once you're maxed on Wounds, there is no further penalty to taking them. So you can choose to take a Wound.

Instincts - 9: Discarding.

Q: What is considered discarding?
A: Whenever a game effect uses the word "discard". There are many ways to use this ability to pay discard costs and make clever plays. A very popular one is as part of the cost to reveal a Frontier Token when playing with Ante Up. Instincts - 9 can be extremely powerful when used in this way. The word is present in all such situations, so look for clever opportunities to use your Instincts - 9 to great advantage!

Losing A Fight: Gain Wound and Poker Card.

Q: When you lose a fight do you always gain a Wound and Poker Card, in addition to other loss rewards such as Train Encounter cards?
A: Yes. The Train cards function the same as the Outlaws and Claim Jumpers. If a player loses a fight with the Guard during a Train Heist, they receive the 1 Wound always assigned for losing a Fight, and any additional Wound shown on the card. For example, the Prison Train says that if the player loses, "Gain 2 Wanted Points and 1 Wound." This means the player would gain 1 Wound and draw 1 Poker Card for losing the Fight as normal, and gain 1 additional Wound and 2 Wanted Points from Prison Train.

Manhunt - 4: Moving the Sheriff.

Q: The rule so far seems to be that the Sheriff only leaves the sheriff's office if there are wanted players. Otherwise, he stays put. Does Manhunt - 4break that rule? Can you move the Sheriff even if no one is Wanted? If not, then what about this scenario:
There are no Wanted Players, but I have points on the Marshal Track. Can I play Manhunt - 4, elect to move the Sheriff 0 spaces since he can't leave the office anyway (0 still fits "up to 3") and still gain the LP?
A: You are correct that the Sheriff does not move if there are no Wanted Players. However, the example that you gave is absolutely doable. Playing Manhunt - 4 would allow you to gain 1LP if you already have Marshal Points (or Wanted Points).

Outfit - 10: Effect.

Q: With Outfit - 10: Poker Card action can I purchase Items from the Trading Post and then purchase Items from the General Store?
A: When you use Outfit - 10, treat the Purchase/Upgrade action as though you were at both the Trading Post and the General Store.

Poker Cards: Value.

Q: Does the word "value" mean just the number, or are you allowed to change the suit as well as the number?
A: The term "value" is consistent throughout the game to mean only the number on the card (i.e. some weapons reduce a card's value, meaning -1 to that card's number). For example, the Cheat - 2 card can only be used to change the numerical value on the card. It cannot be used to alter the card's suit.

Quickdraw - Queen: Canceling a Wound that "cannot be canceled".

Q: The Quickdraw - Queen card cancels a Fight Card text. A Fight Card says the Wound cannot be canceled. Is the Wound canceled or not?
A: Quickdraw - Queen says that it cancels the text of a Fight Card (not the entire Fight), but the Fight Card specifically says that the Wound cannot be cancelled. Since it cannot be cancelled it cannot be stopped by Quickdraw - Queen.

Quickdraw - Queen: Versus Fight Card - 10.

Q: If the Quickdraw - Queen Poker Card and the Fight Card - 10 are played against each other in a fight, which one would resolve first?
A: The correct ruling is that the Quickdraw - Queen cancels the effect of the Fight Card - 10. This is easily confused, given the wording of the cards, and we do apologize for this. Here is an explanation of why this is the ruling:
In the explanation of the order of resolution in which a Player vs NPC Fight occurs here are the relevant steps:
-Both cards are revealed.
-Bonus effects from Character's Abilities, Items, Weapons, and the played Poker Card are applied.
-The Active Player may play any number of Reactions.
-The effects from the played Fight Card are applied.
The effect on a Quickdraw - Queen played will be resolved prior to any Fight Card, including the Fight Card - 10, and thus prevent the resolution of its text if the Player so chooses.

Reactions: During a Fight.

Q: Can you explain how many reaction effects are usable during a fight? Assuming the usual back and forth until both players pass on using reactions.

1: Are you only allowed to use one single Reaction effect, 1 Poker Card or 1 other Reaction effect such as the Holster, in a fight?
2: Are you allowed to use one Poker Card as a reaction along with any number of other card Reaction effects during a fight, Holster followed by the Serape for example?
3: Are you allowed to use any number reaction effects during a fight, so long as any single effect is not repeated? For example: If I play Stick 'Em Up or use the Holster, I am not able to play a 2nd Stick 'Em Up or use the Holster a 2nd time. Whereas I could play Stick 'Em Up, use the Holster, play Ruthless, and finally play the Serape as they are all 4 different reaction effects.

A: Starting with the active player, and alternating, players go back and forth playing reactions until both choose to pass.

Yes, you can play any number of reactions as long as you have the cards. You must play 1 at a time though and allow the opponent to react before playing the next one.

Reactions: Passing, pt2.

Q: When Players are choosing to play Reaction cards, in a fight are Players allowed to pass but 'come back in' if the other Player plays a Reaction card? Or is that as soon as you pass you can no longer take place in this phase?
A: You go until all Players pass. Same with Holster. So you can go back and forth until everyone is done.

Reactions: Playing more than one at a time.

Q: Can I play multiple Sprint - 3 Reactions after a move action? I didn't see anything in the rules that specifically said you can only play 1 Reaction card following an Action and so I wasn't sure if that was implied.
A: Hi Randy, developer here. You cannot play more than one Sprint - 3 because the first one is after the Move Action and the second one is after the previous Sprint - 3. There are a few cases where the opportunity for Reactions bounces back and forth, such as in a Fight between Players, but in most cases the answer is no.

Reputation - 7: Effect.

Q: Let's say a player has 9 Marshall Points and he delivers Cattle to the Rail Station, therefore he should get a Marshall Point but he acquires a Legendary Point instead (because he already has 9 Marshall Points). Can this player play card Reputation - 7 in this case? (Reputation - 7 can be played when you score Marshall/Wanted Point during your turn but I am not sure if in this scenario it counts as getting a Marshall Point)
A: Yes, they can play Reputation - 7. Because the MP is gained but then converted to LP, the requirement to play the Reaction on Reputation - 7 only requires that a player gained the MP/WP not that they gained AND scored it.

Reputation - 7: Wanted or Marshal Track full.

Q: Can Reputation - 7, gain LP when MP or WP gained, be used when a track is full?
A: Yes you can still use it and gain one additional LP.

Rumors - 7: Story Disc placement.

Q: Each legendary story card has 2-3 conditions that list requirement to complete for rewards and placement of a Story Disc next to the condition completed. It's not clear how the Rumors Poker Card interacts with this system. When playing Rumors do you ignore any requirements listed on the condition you place your story disc next to? Such as: Discarding cards, purchasing items, winning a fight, winning poker? And then gain all listed rewards? Like drawing Poker Cards, Story Points, Map Tokens, and Money?
For example:
Story Card # 6 - 'Discard a miscellaneous item at the Mountain Pass A to gain 2 Story Points'.
If I place my Story disc next to one of Story Card # 6' conditions, by playing the action on Rumors, do I gain 2 story points without needing to discard a miscellaneous item or be at the Mountain Pass?
A: Yes, Rumors ignores the costs listed on the Story Card for placing a story token and allows you to place one onto the track and immediately gain the reward. In your example, after playing Rumors for its Action, you'd gain 2 Story Points.

Ruthless - 6: Effect.

Q: Can we play multiple Ruthless - 6 within the same fight?
A: No, you can only play one Reaction per triggering event, in this instance "After cards are revealed in a Fight against another Player..." Stick Em Up uses the "only 1 per Fight" reminder text for consistency with the original printing. It would not be included if the card were created today because of the 1 reaction per trigger rule. Reputation - 7 has the "once per turn" reminder text because there could be multiple triggers in a turn which would allow for multiple Reputation - 7 to be played in a turn.

Saddle Up - 2: Buzzard Gulch.

Q: Can you use Saddle Up - 2: to more to Buzzard Gulch, even if you are on the main map?
A: Yes you can! The town spaces inside the boarder of Buzzard Gulch can be moved to by using Saddle Up - 2:.

Saddle Up - 2: Sprint - 3.

Q: Can Sprint - 3 be used after Saddle Up - 2?
A: No, Move and Move Actions are entirely different things. Sprint - 3 can only React to a Move Action. Saddle Up - 2 is a card Action that just moves you to a space. It isn't a Move Action, so you cannot follow up with a Sprint - 3.

Sheriff Arrest. Discard effect.

Q: The sheriff moves into a space with a wanted player, that player discards a card. Is the discarded card random?
A: You choose the card to discard. Read the Bonus effect on Instincts - 9. That's part of why it exists.

Sheriff: Bandits.

Q: Can the sheriff move in a space occupied by Bandits? If so then what happens?
A: Yes he can, but nothing happens.

Sheriff's space: Gaining Wanted Points.

Q: If a Marshall or a Neutral Player (no Wanted or Marshall Points) is on the same space as the Sheriff, and the Player then gains a Wanted Point (by robbing another Player or whatever), does the Sheriff automatically Arrest them?
A: No. Only if Sheriff enters a space with a Wanted player.

Sheriff: Mesas.

Q: Can the Sheriff move through the Mesas?
A: No, he can't.

Shootout - 8: Effect.

Q: When you are not (or are) the Active Player and use the Bonus ability of Shootout - 8 what happens?
A: A new Fight of the same type is initiated, canceling the Fight where Shootout - 8 was played. Active player always wins ties against other Players unless a power says otherwise. The Active player does not change for the new Fight.

Shootout - 8 .vs Bulletproof - Jack: Resolution.

Q: Both cards have Bonus effects. The Shootout - 8 cancels the results. The Bulletproof - Jack Bonus heals a wound. What happens?
A: This question is a little tricky, and so I spoke with Travis and Hervé this morning to make sure everyone was on the same page. The rules do not currently have an extremely tight order of resolution for Player vs Player fights and situations such as this. To address that fact, here is how all future situations of this type will be resolved:

The card played by the Active Player in a Fight between Players is resolved first. If the Bulletproof - Jack is played by the Active Player, that player would lose 1 Wound, and then the Shootout - 8 played by the other player would resolve, canceling this Fight and starting a new one. However, if the situation were reversed and Shootout - 8 is played first it would resolve prior to the Bulletproof - Jack, and thus cancel the current Fight prior to the resolution of the other player's Bulletproof - Jack and thus preventing the loss of the Wound from ever occurring.

Shootout - 8: NPC Fight Cards.

Q: When I play a Shootout - 8 card against a Bandit, Guard or Sheriff, I have the possibility to reinitiate a new Fight. I would have one Poker Card less for the new Fight, but what about the NPC?
A: Discard the NPC's previous hand, and they draw up the full amount for the new Fight.

Stick-'Em Up - 6: Reaction.

Q: If you play Stick-'Em Up - 6 as your Fight Poker Card, and have another Stick-'Em Up - 6 in your hand, can you play a Stick-'Em Up - 6 as a Reaction?
A: If the first one is played as your Fight Poker Card, you may still use the other one as a Reaction. When a card is played as your Fight Poker Card the only relevant information is its value, and it is not technically being played as a card of that name. So your first card is effectively a 6, and the one played as a Reaction is a Stick-'Em Up – 6.

Story Card: Fights, p2.

Q: Do these types of Fights count as Bandits Fights or other named NPC Fights?
A: It isn't considered a Bandit Fight, you only get the rewards printed on the Story Card and any rewards from your items that trigger off of winning a Fight, the Shotgun for example.
A: Story Cards that initiate Fights count as NPC Fights, such as the Guard at the Bank.

Sprint - 3: Reaction, pt2.

Q: After ending your Move Action to i.e. deliver Cattle, pick up a Gold Nugget, or fight a Bandit can you play Sprint - 3, and continue to move?
A: No. You must end your movement (or with a Bandit, it is forced to end). You can Sprint - 3 to those locations, but not from them after dropping Cattle or Fighting a Bandit.

A: Regardless of what was printed prior, the Complete Rules Reference is considered the official rules text, and the only rules reference we consider when answering questions like this. It to comes down to the difference between "at the end of" triggers and "after."
Dropping off Cattle/picking up Gold Nuggets is not "at the end of a Move Action", it is "after a player ends a move action". Meaning after the "at the end of a Move Action" timing window for Reactions/Abilities has passed. A subtle but important distinction. When you end a move, in any space really, but specifically Ranch/Rail station/space with a Gold Nugget in this case there is a timing window "at the end" of that move in which the Reaction on Sprint - 3 or any card/ability with the same timing can be played. Whether you choose to resolve a Reaction/Ability during this "at the end of a Move Action" timing or not doesn't really matter much, what matters is that AFTER all reactions/abilities to the move action have been resolved you are in the space with the Ranch/Rail Station/Gold Nugget. It is at this point the move action has ended and you are at the "after a move action has ended" timing that dropping off cattle/picking up loose nuggets requires.

Vendetta - 5: Draw card.

Q: Vendetta - 5. At the end it says, "Draw 1 Poker Card". Is this referring to the Player who plays this card or for the other Player who got Wounded? If this is for the Active Player, does the wounded player also get a Poker Card for getting wounded? (since usually player get a Poker Card if getting Wounded/losing a Fight)
A: It is for the Player who played the Vendetta - 5. The other Player does not draw a card for being Wounded, only losing the fight. If the player who played Vendetta - 5 loses the Fight, they will still draw a card for that as well.

Wallop - 8: Resolving.

Q: Is Wallop - 8 fully resolved before other game effects, such as Doc Holiday's Legendary Ability?
A: The Wallop - 8 would resolve completely, then having gained a Wound from its effect, the Doc Holliday player would then draw a card. As such, the Doc Player would have 1 unknown card in their hand going into the Duel.

Poker, Faro, and High Roller Tokens

Aces: In straights.

Q: Most versions of Poker allow the Ace to be the high card (A-K-Q-J-10) or the low card (5-4-3-2-A) in a straight or straight flush. Is that true in this game?
A: Yes, it is! All hands that are legal in Poker, including Poker with wild cards (Cheat - 2/Jokers).

Faro: Playing.

Q: How is Faro played?
A: Faro is played with cards from the Fight Deck. The top 4 cards are drawn by the dealer, who reveals 3 of them. If any Players other than the Active Player join, the Active Player gains $10. Then one at a time each places 1 or 2 bets that are $10 or $20 each using their Bet Markers with the Active Player placing last. The sum of a player's bets cannot exceed the amount of Money they currently have.
After all bets are placed, the Dealer shuffles the 4 fight cards together facedown and offers a cut to the active player. The
Dealer now resolves the rest of the game of Faro in the following way:

Reveal the 1st card: All bets on this number lose. All Players pay the amount they bet on this number to the supply and retrieve their bet marker from the board.

Reveal the 2nd card: All bets placed on this number win! All players are paid an amount of Money from the supply equal to what they bet on this number and gain 1 Gambler Point. Players then retrieve their Bet Marker on this number from the board.

Pause: In the same order in which Players bet, all Players still having at least 1 Bet Marker on the board are asked if they wish to stay for the bonus round. Any that choose not to retrieve their Bet Markers on this number from the board.

Reveal the 3rd card: All bets placed on this number win the bonus! All Players are paid an amount of Money from the supply equal to 3 times what they bet on this number and gain 1 Gambler Point. Players then retrieve their Bet Marker on this number from the board.

Any Bet Markers remaining on the board (those that did not win the bonus) lose. All players with such bet markers pay the amount of their bet to the supply. Payers then retrieve their Bet Marker on this number from the board.

All fight card s used in the game of Faro are now returned to the bottom of the Fight Deck.

Flop: Cheat - 2.

Q: If a Cheat - 2 comes out in the Flop, can all Players use it as any card or is it just a 2?
A: It is treated as a 2 when a part of the Flop.

Poker: Fewer than 2 cards in hand.

Q: What happens if you didn't have any Poker Cards before you triggered the Gambling Action?
A: You can play Poker with a 1 card hand.

Hand Ranking: 5 of a kind.

Q: In the real-world poker rules five of a kind beats a royal flush. I see in the updated Western Legend rules and in the Ante Up player aid the hand order was not changed to reflect this. Is that a design decision or is this just an error that has not been addressed?
A: There was an error in the original Western Legends hand rankings that has been corrected in later printings and products. 5 of a kind is the highest value Poker hand. This is the same in all

forms of Poker that involve wild cards, which Cheat - 2 and Jokers can represent. The highest possible Poker hand is 5 aces, although it is very unlikely that such a hand would ever be required or will occur.

High-roller Token: Gambling choice.

Q: When a Player declares to Gamble at a Saloon with a High Roller Token on it, is it mandatory for them to play against the High Roller, or are they free to choose to play regular Poker/Faro?
A: You choose.

High Roller Token: How to interact, p2.

Q: Can we have a final step by step ruling on HIGH ROLLERS?
A: 1. A Player at a Saloon with a High Roller Token can take an action to challenge the High Roller to a head-to-head game of Poker.
2. The Active Player then draws 1 Poker Card.
3. The player antes $20.
4. The High Roller Token is flipped over, and the Dealer (player to the right of the Active Player) sets aside their own hand and draws the number of cards indicated on the High Roller Token to use in the game of Poker. This is the number above the line on the High Roller Token.
The Dealer/Saloon does not ante any money.

5. Three cards are now drawn from the top of the Poker deck and turned face-up forming the Flop.
6. The Active Player and the Dealer select the cards they intend to use, and then reveal them at the same time.
7. The Active Player and the Dealer now each make the best 5 card Poker hand they can with 2 more cards from their hand and the 3 in the flop.
8. The best Poker hand wins. If there is a tie, the Active Player wins.
9. Resolution:

A. If the Active Player wins, the gain only their $20 ante, the rewards indicated on the High Roller Token, and any additional rewards due to items, character abilities, or cards such as Lady Luck - 10 or Jackpot - 9.

B. If the active player loses, they place their $20 ante in the supply, and draw 1 Poker Card.

In either case, the high roller token is discarded.

A: This will be one of the many things clarified in the ultimate rules that are being worked on and are a part of the Western Legends: Blood Money campaign that launches on August 11th. Sorry for the confusion.

High Stakes Poker: Explained.

Q: I'm planning to put the High Stakes Poker variant to my Western Legends game, but I couldn't understand the variant rule in the book. Could somebody explain it to me in a more detailed way and clarify to me?
A:
1. Is the first ante 10$?
A. Yes
2. What does forfeiting the hand mean?
A. In real poker terms it means you fold. The money you have already put in is lost, but you will not have to use any of your cards nor wager the additional money to see anymore cards.
3. Do players have to choose two cards from their hand before turn, and river revealed?
A. No
4. What's happening exactly when in a 3 player game everybody adds 20$?
A. The pot grows by that amount, and all players who paid the $20 will have the opportunity to make the best hand they can at the end, with the winner gaining the rewards. Additionally, the Saloon adds $20 if the hand continues.
5. Does the 10-Gallon Hat activate if I win that poker?
A. Yes.

Joker: Poker.

Q: If I'm playing Poker and let's say I play an Ace and a Joker. Can I make the Joker copy the Ace? Or do I have to reveal a different card from my hand to make the Joker copy?
A: The Joker relies upon another card in your hand that is not being played at that time.

Poker: Play at no cost.

Q: A couple of Event Cards say to play a game of Poker at no cost. If they win, they get various points, but no mention of cash winnings. Question is, does a game of Poker at no cost mean no ante but normal dealer pot, or no money at all?
Q: And is it then a normal game of Poker

A: It means that the player does not have to pay an ante. All other rules regarding the dealer, house money, and points are followed.
A: A normal game of Poker.

Poker: Ties.

Q: Does the Active Player or Dealer win ties during Poker?
A: Earlier it was ruled that the Active Player wins ties against the Dealer. The consolidated hardback rules have since updated the Dealer to be defined as an NPC. Therefor the Dealer wins ties during Poker.

Weapons, Mounts, Items, and Legendary Items.

10 Gallon Hat: Winning Poker.

Q: If you are wearing a 10 Gallon Hat and are not the Active Player. Do you still get 1 LP for winning?
A: Yes, a Player with the 10 Gallon Hat earns an LP when they win at Poker, even if they are not the Active Player. If they are and have one, they gain 2LP.

10 Gallon Hat: Faro.

Q: Does the 10 Gallon Hat work in faro?
A: Nope. We have updated the term "Gambling" to encompass all forms of Poker and the new game Faro. Otherwise, any reference to Poker only works with Poker.

Black Coat: Effect.

Q: Is the Black Coat ability for Wanted Players to switch to the Wanted Track ongoing for the card holder? (Can you take 2 Wanted Points and then take Marshal Points from another action while you possess this card?)
A: Not ongoing. Updated wording on card bc of the confusion. "After you gain this, gain 2 Marshal or 2 Wanted Points. A Wanted Player that gains this may choose to gain Marshal Points in this way."

Card Abilities: Number of uses.

Q: Can you activate a Weapon card or an Item card more than once in your turn?
1) i.e. If a player with a Peacekeeper Arrests a Player (gain 1MP) then moves and then Wrangles Cattle (does he then get another 1MP)?

2) i.e. If you are already at a Mine, can you use the Miner's Map each time, with each Action to re-roll one die for that Action?
Q: Yes and yes.

Holster: How to use.

Q: Do you just play cards back and forth until someone gives up?
A: No. Fights are different from other Reactions since they are a more complex type of Action. Though you can only play a single reaction to a Move Action, as in using Sprint - 3 OR Wallop - 8 (not both at the end of the same move action), you can use multiple Reactions in a Fight. Each player goes back and forth until neither player takes further Reactions. HOWEVER, each Reaction from a player is simply once per type of reaction--hence why Stick-'Em Up - 6 stipulates a limit of 1 per fight.

EXAMPLE: (assume each player played the same value card, like a 10 value)

Player one plays Stick-'Em Up - 6 .

Player two uses Holster, discarding 3 cards.

Player one (who also has a Holster) uses the same ability discards 1 card.

Player two has no further Reactions.

Player one wins the Fight because they initiated the Action and are the active player--who always wins in a tie between players.

So, to answer your question, each player can use the Holster Reaction ONCE in a fight, meaning they would choose to discard 1 or more cards in a single Reaction, not going back and forth wherein they could discard 1 card and then discard more cards later.

Legendary Items: Discarding.

Q: Some Legendary Items have effects that require you to discard them. When you discard a Legendary Item, is it returned to the supply making it possible to find them again? Or are they removed from the game?
A: Added back to supply.

Marked Cards. Effect.

Q: When the card says to “replace” a card from the Flop with one from your hand, does that mean that you take the Flop card you replaced and put it into your hand, or do you discard it?
A: The card is discarded. If the Flop card went to your hand we would have said "swap a card in the Flop with a card in your hand".

Mounts: Switching, pt2.

Q: If I have 6 Gold Nuggets or two Cattle Tokens from my Mounts ability and I switch to a Mount that does not increase my Gold Nugget or Cattle Token maximum what happens?
A: You discard any extra Gold Nuggets or Cattle Tokens you can no longer carry.

Marshal Badge: New Arrest.

Q: Does the new Arrest with a Marshal Badge have to be the same participants as the original?
A: It is against the same target.

Marshal Badge: Poker Card draw.

Q: After cards are revealed in an Arrest you may discard this to cancel that Arrest and initiate another Arrest. If you do, draw one Poker Card and gain 1 LP."
So that Poker Card draw at the end, would that be playable in the second Arrest? Or only after the second Arrest is resolved? (i.e. do you draw the Poker Card before or after the second Arrest attempt?)
A: You could use it in the second attempt.

Miners Map: Reroll timing.

Q: The Miner's Map card states "After you Prospect for Gold, you may reroll 1 of your Prospecting Dice." Does this reroll occur after you've resolved the Prospect Action (resolving the initial 2 dice), essentially being the same as rolling a 3rd die? The wording seems clear that you do.
A: It means once per Action, you may choose one of your dice and reroll it, taking whatever the result is. So, if you rerolled gravel, gravel is what you get.
A: No, sir. It means you may reroll one die for a different result.

Miners Map: Uses.

Q: Not exactly sure how this card is supposed to be used. Is it a one use thing and discard? If not, can you use it once per ACTION or once per TURN (Turn=3 actions).
A: You keep it. Once per Prospect Action, you may reroll one die.

Peacekeeper: Delivering 2 Cattle Tokens.

Q: How many Martial Points are gained when delivering 2 cattle while I have
a Peacekeeper equipped?
A: If you are holding two Cattle Tokens and a Peacekeeper when you deliver, you gain 2 MP for the Cattle (plus any bonus written on the tokens) and 1 MP for owning a Peacekeeper. The total is 3 MP + any bonus on the tokens.

Peacekeeper: French language printing error.

Q: I noticed that in the English version, you get a MP for Cattle sold. But in the French version, it says you gain a LP for cattle sold.
A: The English version has the correct language and the French version is in error.

Quarter Horse: Flipping.

Q: There's two ways to read the upgraded Quarter Horse ability. It says to "flip it" to draw a Poker Card and gain an Action, but there's nothing about flipping it back at some future point. So how does this work?
A: You flip it back to the non-upgraded side. Now it's a regular Quarter Horse until you visit the store and pay to upgrade it again.

The Man in Black

I found this terrific Man in Black resource posted by SynapticAcid Copied here in full with threads listed below.

The Man in Black: Rules and FAQ.

SynapticAcid wrote:

Since I was unable to locate complete text for the Man in Black Rules Card anywhere online, and there are numerous questions regarding these rules, here is the text (updated per Errata) and a compilation of FAQs.

The Man in Black Rules

For the 2-player version of the game, players will use The Man in Black deck, which is comprised of 10 Action cards and 1 Rules card. Gameplay remains the same, with players fighting to obtain the most LP. However, The Man in Black is also trying to win the game!

Detailed rules for the Man in Black can be found on the Man in Black Rules card:

SETUP: The Man in Black is used in the 2player game only. Choose a player miniature to represent The Man in Black. Place the Man in Black at the Rail Station during setup. Place the same color cube on the 0 space of the LP track. Shuffle The Man in Black deck and place it near the game board.

GAMEPLAY: After both players have taken their turn [ERRATA], draw and resolve 1 card from The Man in Black deck. The Man in Black cannot gain Marshal points, Wanted points, or wounds. Players in the same space as The Man in Black may duel or rob him. After a player chooses their Poker Card in a fight against The Man in Black, draw the top 3 cards of the fight deck and resolve the highest value card. Decrease the value of the card played by the other player by 1. After the fight return all revealed fight card s to the bottom of the fight deck in a random order. The Man in Black wins all ties [FAQ: Even against Jesse James]. Treat the results of any fights with The Man in Black as if he were another player. The Man in Black has an unlimited amount of money and gold nuggets. If a player robs The Man in Black, they gain 1 Wanted point and choose to steal $60 or 2 gold nuggets from the supply. Cards that show a bandit icon will spawn bandits in the indicated bandit hideout spaces.

GAME END: If The Man in Black ever reaches the requisite number of LP to trigger the game end, finish the current round and then each player takes one more turn, including The Man in Black. If The Man in Black has the most LP at the end of the game, he wins. If there is a tie at the end of the game with The Man in Black, he wins instead.

FAQs:

How often does The Man in Black take a turn?
Once per round, after both players have taken their turn, per this thread and the Errata Corrected rules above.

Is The Man in Black an NPC or "player"?
The Man in Black is an NPC, per the designer, Hervé Lemaître, in this thread, but he acts like a third "dummy" player.

When fighting The Man in Black, who wins in a tie?
The Man in Black wins all ties (per the Rules above), even against Jesse James, per the designer, Hervé Lemaître, in this thread. Once the outcome of the fight is determined, "Treat the results of any fights with The Man in Black as if he were another player" per the Rules above. Additionally, per the Game Rules: "Regardless of the type of fight, the player that loses the fight always gains 1 wound and draws 1 Poker Card." The Man in Black cannot gain wounds.

If The Man in Black attacks a player (to Duel or Rob) and the target player defeats The Man in Black, does the victorious player receive any rewards (e.g. 2 LP for winning a Duel)?
No, per the Game Rules and this thread, only the Active Player receives rewards. On The Man in Black's turn, he is the Active Player. Thus, if the target player wins the fight, the target player does not receive any reward (instead they avoid gaining 1 wound or getting robbed).

Does The Man in Black gain 1 LP when he moves to a Bandit Hideout? Or does he only gain 1 LP if a Bandit is there and then removed?
The Man in Black gains 1 LP when a Bandit is removed, not just for moving to an empty Bandit Hideout, per this thread.

Does The Man in Black ever put a disk on the Story Cards?
No, per this thread.

MiB: Fight outcomes, p2.

Q: If I draw the MiB card that says to place him "in the same space as the character with the most LP. MiB Fights that Player"(not Robs, like indicated on another MiB card)
- Is this then treated as a Duel? (player draws 1 Poker Card, someone draws 3 fight cards for MiB, decrease player's card by 1 rank, resolve).
- so if MiB wins, he gets 2 LP?
- If player wins, they get nothing?
- Same setup, but if the MiB card says he tries to "Rob" the Player instead.
- Draw cards like above, or does MiB auto-

succeed?
- The MiB cards tells you what happens if MiB wins (the Robbery), but if the Player wins they get nothing?
A: MiB card says to treat him as another Player. Cary out the fight and give rewards the same as if two players were Fighting.

MiB: Gaining LP From Bandits.

Q: My question is to do with his cards that revolve around "teleport to x bandit hideout, if there's a Bandit remove it, etc...". Specifically, a slight alteration of wording between some of them.

They will either be worded as:
1. Move the Man in Black to Bandit hideout _ in ____. If there is a Bandit there remove it, and the Man in Black gains 1 LP.

OR

2. Move the Man in Black to Bandit hideout _ in ____. If there is a Bandit there, remove it. The Man in Black gains 1 LP.

The key difference being that in example A, due to the comma it comes across as the LP gain is dependent on the Bandit removal, whereas in example B due to the period the LP gain seems independent of there being any Bandits to remove. Is this variation intentional? If so, is my understanding of those statements correct and they do differ? If not, how should they be read?
A: Hi there! I just went over the MIB cards so as to answer. I am not seeing the wording mentioned. I did see a slight variation on cards 4 and 5, which would imply that the $10 loss happens regardless if a bandit is there. Was this what you meant? Otherwise, the other bandit cards read as intended--which was that if a bandit is removed, a penalty is doled out.

MiB: Ties in Fights.

Q: Is the MiB an NPC or a Player for the purposes of ties in a Fight?
A: The Man in Black is an NPC, so Jesse James doesn't win tie fights against him for example

MiB: When does the MiB take their turns?

Q: Does the MiB take a turn after each Player or once per round after Players?
A: The confusion was caused using the word "each" in the first print run. The Man in Black rules card said "After each Player has taken their turn..." Unfortunately, this led to confusion as the intent was for the Man in Black to have a turn once per round. The language has been updated to "After both Players have taken their turn..."

Goal Cards and Legendary Tokens

Goal Card: Completing.

Q: Is it possible to score your Goal, for instance to discard a Poker Card after winning a game of Poker, while playing Poker in another player's turn?
A: Personal Goals can be completed on your turn only.

Goal Card: In or out of town.

Q: If you Fight against a gang or any other NPC from a story card (either when you or a different player resolves a Story Card you contributed to), does it count as a Fight in (or out of) town for the purpose of Goal Cards?
A: Indeed it does.

Goal Card: Tracking progress.

Q: Some Personal Goals require an amount of a game component to be turned in, 4 Gold Nuggets for example. Do these Goals need to be completed all at once or can they be completed in steps?
A: All goals are satisfied at once with a single Action or a Location with all the requisite conditions. There is no tracking progress, etc. One and done.

Goal Card: Discarding and card Action effects, pt2.

Q: When a Goal Card requires you to discard a card, such as Provisions, do you also get the benefit of discarding that card?
A: When discarding a Provisions card to complete a goal, you do not gain the benefit printed on the item card itself. The text on the Provisions card distinguishes the benefit as an Action. This is an instance of a Goal Card that is not a condition to be met, but rather an action being taken to complete the goal. You can choose to discard the Provisions for the healing benefit, or you can choose to discard it to complete the goal, but not both.
A: Completing a goal is not an Action, therefore you do not resolve the "Action" effect on the item. It is a cost. I can consume Provisions for its effect or I can deliver to complete my goal. I cannot do both.

Legendary Tokens: Maximum number.

Q: Just to follow up then - at the end of the game no player will ever have more than 3 Legendary Tokens. Correct? In other words, the other opportunities would just give you more chances to cycle through the Legendary Tokens looking for more points.
A: Correct. Once a player has 3 Legendary Tokens, they can continue to take Actions that result in them gaining more, but it only serves to filter out lower value Legendary Tokens. They cannot keep more than 3.

Legendary Tokens: Gambler Track.

Q: When you are getting extra Legendary Tokens from the Gambler track are you still capped out at only having 3 Legendary Tokens
A: Yup.

Legendary Tokens: With Ante Up, pt2.

Q: The rulebook literally mentions nothing about how gaining LT relates to the base game's rules about Goal Cards and LT. I kind of ruled it to my interpretation, and wanted to see if it was correct or not.
Obviously, you are still capped at 3, but before you could never have more than you had Goal Cards completed, and that obviously isn't the case anymore. So, how is that situation handled? I still played you drew 1, 2, or 3 depending on how many Goal Cards you complete, but how many you discard from your collection of Legendary Tokens changes depending on how many you have. Example, if I have two and I draw two for my second Goal, I would only have to discard one token because that puts me at three, but if I had three tokens already when I drew two for my second Goal I would have to discard two, since I was already at three. Is this correct?
A: Hi Amado, developer here. Sorry for the confusion here. There is a slight issue with how Legendary Tokens work when using Ante Up and Goal Cards. The intention is that completing Goal Cards should always allow you to net 1 LT until you have a total of 3 at which point you simply filter the ones you have. With our upcoming expansion Western Legends Blood Money, there will be a complete rule book that includes some updates, and this will be one of them. While the text is not finalized yet here is the way it will work and how you should play even if you choose not to buy Blood Money.
If you have gained 2 LT due to progress down the Gambler Track, Frontier Tokens, or other means, and then complete your first Goal you will draw 1 LT and keep it, not looking at the now 3 you have and discarding down to 1 based on the number of Goals you have completed. If you then completed another Goal, you would draw 2 LT bringing your total to 5, choose the 3 highest to keep, and return the extra 2 to the supply.

A: Here is as detailed breakdown as I can provide:
LT
0: Complete 1st goal. Draw 1 LT and keep it. You now have 1 LT
1: Complete 1st goal: Draw 1 LT and keep it. You now have 2 LT
1: Complete 2nd goal: Draw 2 LT, look at the 3 that you have and choose 2 to keep netting 1. You now have 2 LT
2: Complete 1st goal: Draw 1 LT and keep it. You now have 3 LT.
2: Complete 2nd goal: Draw 2 LT, look at the 4 you have and choose 3 to keep netting you 1. You now have 3 LT.
2: Complete 3rd goal: Draw 3 LT, look at the 5 you have and choose 3 to keep netting you 1. You now have 3 LT.
3: Complete 1st goal: Draw 1 LT, look at it the 4 you have and choose 3 to keep netting you zero. You now have 3 LT.
3: Complete 2nd goal: Draw 2 LT, look at the 5 you have and choose 3 to keep netting you zero. You now have 3 LT.
3: Complete 3rd goal: Draw 3 LT, look at the 6 you have and choose 3 to keep netting you zero. You now have 3 LT.
0: Gain 1 LT from a non-goal source: Draw 1 and keep it netting you 1. You now have 1 LT.
1: Gain 1 LT from a non-goal source: Draw 1 and keep it netting you 1. You now have 2 LT.
2: Gain 1 LT from a non-goal source. Draw 1 and keep it netting you 1. You now have 3 LT.
3: Gain 1 LT from a non-goal source. Draw 1 look at the 4 you have and choose 3 to keep netting you 0. You have 3 LT.
2: Gain 2 LT from a non-goal source. Draw 2 look at the 4 you have and choose 3 to keep netting you 0. You have 3 LT.
3: Gain 2 LT from a non-goal source. Draw 2 look at the 5 you have and choose 3 to keep netting you 0. You have 3 LT.

I hope that clears things up. I am sorry for the confusion, and I know this is an errata to the

conflict between the base game rules and the inclusion of Ante Up, and is why the system is being change to work this way in the Complete Rules Reference. Thanks.

Characters and Legendary Abilities

Starting Items: Gaining.

Q: Are stating Items considered 'gained' during setup? For example, Calamity Jane starts with a Provisions item. Do you get to draw the Poker Card from that starting item?
A: Yes. Calamity Jane does draw the Poker Card from the Provisions Card.

Legendary Abilities: When Active.

Q: When exactly is a Legendary Ability considered active?
A: When you start an Action, if you do not have your ability unlocked, it would not trigger at the end of that Action.

Annie Oakley: Shootout - 8.

Q: Annie Oakley's ability is that, at the start of a fight with another Player, that Player must discard a card or gain one wound. If Annie Oakley plays Shootout - 8, she can immediately cancel the results of that fight and initiate a new fight. Does Annie's ability trigger again?
A: Hello Everyone, this has been quite a debate with good points made on both sides of the argument. As one might imagine when working on a game as big as Western Legends there are always going to be unintended or unexpected interactions. Regarding Shootout - 8, it was never intended to allow characters to trigger their abilities more than once. Up until Blood Money, the specific timing of "start of turn" and "start of fight" abilities had never been officially codified in the rules in terms of a timing structure which is part of the problem here. If we were going explicitly by the rules as written under the updated timing structure, if you play Shootout - 8 you would have to Fight another player entirely because a player can only initiate a fight with another Player once per player per turn.

When these original cards were written the timing of abilities and effects and the structure of Fights was a bit more nebulous. The intent of Shootout - 8 is to cancel the Fight in Phase 3, then back up to the play cards face down step of Phase 2 which would not allow for "start of fight" abilities to trigger a second time. If we were writing Shoot Out today it would not include the language to start a new fight. It would say something along the lines of "Bonus: If this card is played in a fight, you may immediately cancel the revealed cards. Players must play a new card facedown or decline, then reveal the newly played cards."

Bat Masterson: Move vs Move action.

Q: Is the move from Bat Masterson's ability considered a Move Action? I.e. Can he deliver Cattle then Use Sprint - 3, Wallop - 8, or Whisky? Move through a mountain pass to Buzzard Gulch?
A: Movement is only a Move Action if it says, 'Move Action', otherwise it is just free moves.

Billy The Kid: Legendary Ability.

Q: Billy the Kid's Legendary ability, "...the player Must Give you 1 Poker Card or 10$" ...who chooses? Billy or the other Player? If Billy chooses a card... is it random, does Billy choose, or does the other Player choose?
A: If you are Billy, you choose if you want 10$ or a Poker Card. If Billy chooses a card, the other Player choose the card.

Bloody Knife: Mesa

Q: Can Bloody Knife end his turn on a Mesa from extra movement, such as the Risk Die?
A: Regarding the interaction with Bloody Knife's ability, he cannot end his movement on a Mesa regardless of whether it was a Move Action or movement provided in another way.

Johnny Ringo: Legendary Ability.

Q: We have cards that prevent Wounds. Playing cards, gangs, and others. Is this Wound an extra Wound and is it unstoppable?
A: The Wound inflicted by Johnny Ringo is both extra, and part of the Fight. For example, if Johnny loses a Fight with another Player, the opposing player still takes 1 Wound. If Johnny wins a Fight against a Player, that opposing Player takes 1 Wound for losing the Fight and 1 Wound from Johnny Ringo's ability. However, if the opposing Player played Bulletproof - Jack in either case they would take no Wounds from Johnny Ringo. As such, similar effects on cards like Gang, Posse, and Serape would prevent the Wound inflicted by Johnny Ringo's ability as well as any others gained as part of the Fight.

Pearl Heart: Legendary Ability.

Q: How does Pearl Heart's ability work?
A: Each time anything occurs during Pearl's turn that results in the gain of MP/WP draw 1 card and move up to 2 spaces. If Pearl robs the Bank and gains 3 WP the ability activates once. If later in the same turn the player successfully robs another player and gains 1 WP the Player activates the ability again.
I would also suggest the movement falls into the rule of the other reactionary movement rewards. Meaning it's not a Move Action and therefore you cannot use Sprint -3, Wallop - 8, or Deliver Cattle etc. but bandits still attack.

Poker Alice: Legendary ability.

Q: So, my play group is a little confused with the verbiage of Poker Alice's special ability and need some clarification. It says once per turn she may initiate a game of Poker "and draw an extra Poker Card". Here is our confusion, does Poker Alice:

1) Initiate a game with usual $10 buy in and draw a card as per the poker rules and then draw an EXTRA Poker Card equaling two Poker Cards.

Or

2) start a game of poker for free and draw a Poker Card.
A: It's 1. The poker game is played normally, with the exception that any player can play from anywhere, including Alice. The ability is an action itself, so while it does not have to take place at a Saloon, it does still require an Action. I hope that helps. She also draws an additional Poker Card from her ability.

Tiburico Vasquez: Legendary ability.

Q: Card says, "Move your cube to the corresponding numbered space of the Marshal or Wanted Track without gaining the rewards". What does this mean? Corresponding to what?
A: Each space on the Marshal and Wanted Track has a number in the top center of each space. As an example, if you are on space 6 of the Marshal Track and use the ability you would move your cube to space 6 on the Wanted Track.

Wyatt Earp: Legendary ability.

Q: Wyatt Earp's ability to get an extra Action the first time you kill a Bandit each turn, this wouldn't trigger for killing a bandit in a Story Card on your turn, correct?
Q: Correct. Only Bandits on the board.

Y.B Rowdy: Legendary ability

Q: After reading Y.B. Rowdy's power:
"After you start your turn outside of a Town, you may discard 1 Poker Card to move up to 3 spaces"
Our group had a few questions:
1) When can they use it? Is it right at the beginning of the turn (before any actions) or at any time?
2) How many times can they use it? Once, or as many times as they have Poker Cards?
A: It can be used once and only if you start your turn outside of a town--as in the start of your turn. You cannot use a reaction like Sprint - 3 on this, as it is not a Move Action

Events, Frontier Tokens, Map, Story Cards, and Miscellaneous - p1

Poker Cards, Fight Cards, Fights, Bonus, Reactions, and the Sheriff – p4

Poker, Faro, and High Roller Tokens – p6

Weapons, Mounts, Items, and Legendary Items - p7

The Man in Black – p8

Goal Cards and Legendary Tokens – p9

Characters and Legendary Abilities – p10
