- 8 event cards
- 16 event tokens
- 8 Legendary items
- 6 Sheriff cards
- 6 wooden wound markers (replaces base game cardboard wound markers)
- 18 bullet shaped player markers (replaces base game cubes)

SETUP

When playing with ***Wild Bunch of Extras***, shuffle the following new content with the corresponding ***Western Legends*** content before following the steps for game setup. (Some ***Wild Bunch of Extras*** content is only compatible when playing with specific ***Western Legends*** expansions as noted in these rules):

- characters (when playing with ***Western Legends: Ante Up***)
- story cards (remove ***History Repeats Itself*** when not playing with ***Western Legends: Ante Up)***
- event cards (when playing with ***Western Legends: Ante Up***)
- event tokens (when playing with ***Western Legends: Ante Up***)
- train encounter cards (when playing with ***Western Legends: Ante Up***)
- frontier tokens (when playing with ***Western Legends: Ante Up***)
- Man in Black cards (remove Man in Black cards 16, 20, and 21 when not playing with ***Western Legends: Ante Up)***
- bandit cards (if playing with the bandit card variant from the ***Western Legends: Fistful of Extras*** expansion)

Include the new item cards in the setup for the General Store and Trading Post (if playing with ***Western Legends: Ante Up***) following normal setup.

If both the General Store and Trading Post are full, shuffle all of the Legendary items together and place them facedown beside the board, otherwise place them in an open space.

STORY CARDS

A Wild Bunch of Extras features story cards with a new condition: end your move in a space with an event or frontier token. It is important to note that these story cards are only compatible with the rules used when playing with ***Western Legends: Ante Up***.

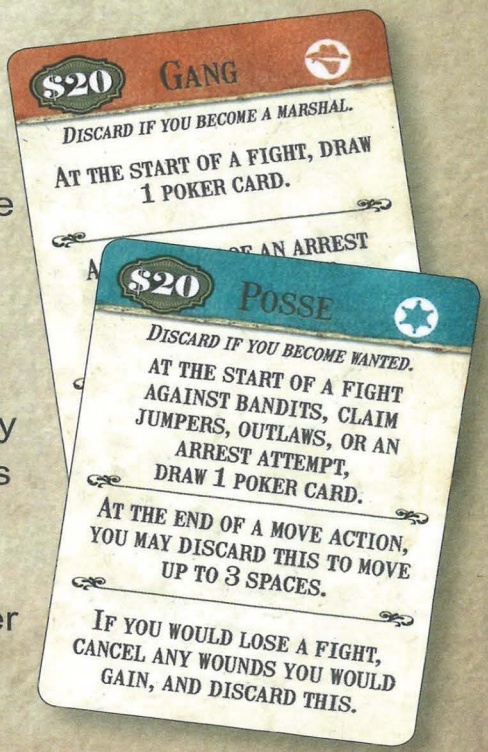

There are five additional story cards included in this expansion that have the same condition as story cards from previous ***Western Legends*** products. These story cards are compatible with any configuration of ***Western Legends*** rules and expansions.

TITLE CARDS

To play with this variant, shuffle all of the title cards into a deck and randomly reveal one during setup. The selected title card provides a new condition that is in effect for the duration of the game. Each title card adds or alters one or two rules that can greatly affect the strategy players should pursue. If at any point the effect on a title card conflicts with the normal rules of ***Western Legends***, follow the instructions on the title card.

GANG/POSSE CARDS

To play with this variant, place the double-sided gang/posse cards beside the board during setup. When playing with gangs and posses players may take a recruit action at the following locations:

Sheriff/Marshal's Office: A Marshal player may take a recruit action at the Sheriff's or Marshal's Office by paying $20 to gain a posse card. The posse card is placed next to the player's board and all rules for the posse are followed. A player can never have more than one posse card at a time.

Outlaw Camp: A Wanted player may take a recruit action at the Outlaw Camp by paying $20 to gain a gang card. The gang card is placed next to the player's board and all rules for the gang card are followed. A player can never have more than one gang card at a time.

SHERIFF VARIANT

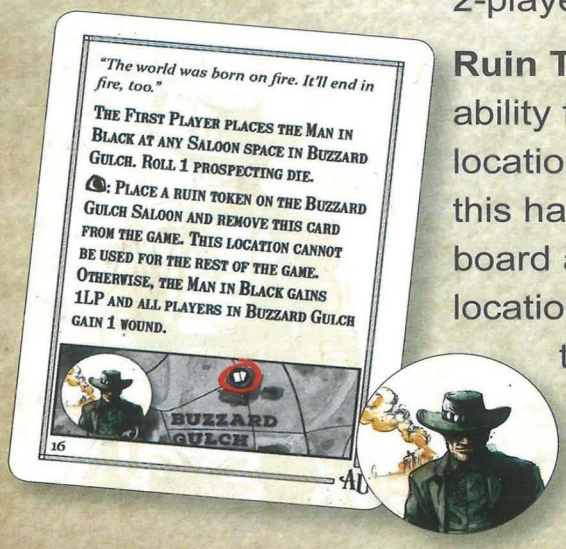

This variant introduces the sheriff deck, which consists of personality variations for the Sheriff. To use this variant, shuffle the sheriff cards during setup and reveal the top card of the deck. The text on the card indicates the differences between this Sheriff and the standard Sheriff. Follow all normal Sheriff rules except those explicitly covered on the active sheriff card. If the Sheriff loses a fight, the active sheriff card is discarded and a replacement is drawn. The new sheriff card will remain in effect until losing a fight.

NOTE: Regardless of which Sheriff arrests a player, they still gain 1 wound and lose all of their Wanted points.

If the Sheriff deck is ever depleted, shuffle all of the sheriff cards together and reveal a new one.

MAN IN BLACK

The ***Wild Bunch of Extras*** Man in Black cards are only for use in 2-player games. When playing not playing with the ***Western Legends: Ante Up*** expansion be sure to remove cards 16, 20, and 21 from the deck as those refer to locations on the ***Western Legends: Ante Up*** board. To add these Man in Black cards to your 2-player games, shuffle them with all other Man in Black cards and follow all rules for the 2-player game.

Ruin Tokens: ***Wild Bunch of Extras*** introduces the ability for the Man in Black to permanently destroy certain locations on the board for the rest of the game. When this happens, add a ruin token to the location on the board as instructed by the Man in Black card. A ruined location cannot be used by any player for the remainder of the game.

UNIQUE EVENTS

Wild Bunch of Extras introduces a set of unique events designed to be mixed in with the existing event tokens from ***Western Legends: Ante Up***. These can be identified by their blue coloration and matching event token. Unlike other event tokens these tokens, have unique abilities and encounters. When a unique event is drawn, spawn the token as indicated on the card and set the card beside the board as a reference for all players.

LEGENDARY ITEMS

Legendary items were first introduced in the ***The Good, The Bad, and The Handsome*** expansion. They follow all of the existing rules as follows:

Legendary items will be mounts, weapons, or miscellaneous, abiding by the same rules as all other items with the exception that mounts and weapons cannot be upgraded. However, some Legendary items provide LP at the end of the game similar to upgraded mounts and weapons.

If a player gains a Legendary item and they already have three miscellaneous items, they may choose to discard another miscellaneous item to make room on their player mat. If a Legendary item is discarded, return it to the deck of Legendary items and shuffle the deck.
